We start with the basics where you'll get to know all about LLVM

We then cover how you can use LLVM library calls to emit intermediate representation IR of simple and complex high level language paradigms

Moving on we show you how to implement optimizations at different levels

write an optimization pass

generate code that is independent of a target and then map the code generated to a backend

The book also walks you through CLANG IR to IR transformations

advanced IR block transformations and target machines

By the end of this book you'll be able to easily utilize the LLVM libraries in your own projects

Style and approach This book deals with topics sequentially increasing the difficulty level in a step by step approach

Each topic is explained with a detailed example and screenshots are included to help you understand the examples *LLVM Cookbook* Mayur Pandey, Suyog Sarda, 2015-05-30
