Communications, Industrial Networking and TCP/IP, 2012 **Study on the Development of Neutrosophic Triplet Ring and Neutrosophic Triplet Field** Mumtaz Ali, Florentin Smarandache, Mohsin Khan, Rings and fields are significant algebraic structures in algebra and both of them are based on the group structure In this paper we attempt to extend the notion of a neutrosophic triplet group to a neutrosophic triplet ring and a neutrosophic triplet field **Zoomland** Florentina Armaselu, Andreas Fickers, 2023-12-31 Despite a variety of theoretical and practical undertakings there is no coherent understanding of the concept of scale in digital history and humanities and its potential is largely unexplored A clearer picture of the whole spectrum is needed from large to small distant to close global to local general to specific macro to micro and the in between levels The book addresses these issues and sketches out the territory of Zoomland at scale Four regions and sixteen chapters are conceptually and symbolically depicted through three perspectives bird's eye overhead and ground view The variable scale representation allows for exploratory paths covering areas such as theoretical and applicative reflections on scale combining a digital dimension with research in history media studies cultural heritage literature text analysis and map modelling creative use of scale in new digital forms of analysis data organisation interfaces and argumentative or artistic expressions Zoomland provides a systematic discussion on the epistemological dimensions hermeneutic methods empirical tools and aesthetic logic pertaining to scale and its innovative possibilities residing in humanities based approaches and digital technologies Enter the Zoomland game here or watch the teaser **Error Correction Coding** Todd K. Moon, 2020-12-07 Providing in depth treatment of error correction Error Correction Coding Mathematical Methods and Algorithms 2nd Edition provides a comprehensive introduction to classical and modern methods of error correction The presentation provides a clear practical introduction to using a lab oriented approach Readers are encouraged to implement the encoding and decoding algorithms with explicit algorithm statements and the mathematics used in error correction balanced with an algorithmic development on how to actually do the encoding and decoding Both block and stream convolutional codes are discussed and the mathematics required to understand them are introduced on a just in time basis as the reader progresses through the book The second edition increases the impact and reach of the book updating it to discuss recent important technological advances New material includes Extensive coverage of LDPC codes

including a variety of decoding algorithms A comprehensive introduction to polar codes including systematic encoding decoding and list decoding An introduction to fountain codes Modern applications to systems such as HDTV DVBT2 and cell phones Error Correction Coding includes extensive program files for example C code for all LDPC decoders and polar code decoders laboratory materials for students to implement algorithms and an updated solutions manual all of which are perfect to help the reader understand and retain the content The book covers classical BCH Reed Solomon Golay Reed Muller Hamming and convolutional codes which are still component codes in virtually every modern communication system There are also fulsome discussions of recently developed polar codes and fountain codes that serve to educate the reader on the newest developments in error correction
