Eco Tech Sustainable Architecture And High Technology:

Eco-tech Catherine Slessor, John Linden, 2001-01-01 The high tech architecture movement embodied by seminal buildings such as Paris's Centre Pompidou 1977 and London's Lloyd's Building 1986 has undergone a subtle but palpable transformation While daring feats of structural engineering still mark recent projects by the architects who forged the earliest examples a new generation has expanded the vocabulary of this architectonic language and evolved an architecture with different aims The most significant of these objectives is to create a sustainable architecture This international survey presents projects completed in the 1990s that use high tech forms and materials for environmentally intelligent means It brings together innovative approaches by established practitioners Richard Rogers Norman Foster Nicholas Grimshaw and Michael Hopkins with a new generation Thomas Herzog Von Gerkan Marg Design Antenna and Itsuko Hasegawa The introduction charts the evolution of high tech architecture and its progression toward more ecological concerns and the movement as a whole is considered in a broader architectural context At the book's heart is a selection of forty of the world's most sophisticated projects each with a thorough description of its unique architectural and technological features as well as extensive plans drawings and sketches A complete reference section includes architect biographies and technical details of each project Accompanying the texts and drawings are spectacular photographs most of which were specially commissioned for this publication

Building for Life Stephen R. Kellert, 2012-09-26 Sustainable design has made great strides in recent years unfortunately it still falls short of fully integrating nature into our built environment Through a groundbreaking new paradigm of restorative environmental design

award winning author Stephen R Kellert proposes a new architectural model of sustainability In *Building For Life* Kellert examines the fundamental interconnectedness of people and nature and how the loss of this connection results in a diminished quality of life This thoughtful new work illustrates how architects and designers can use simple methods to address our innate needs for contact with nature Through the use of natural lighting ventilation and materials as well as more unexpected methodologies the use of metaphor perspective enticement and symbol architects can greatly enhance our daily lives These design techniques foster intellectual development relaxation and physical and emotional well being In the works of architects like Frank Lloyd Wright Eero Saarinen Cesar Pelli Norman Foster and Michael Hopkins Kellert sees the success of these strategies and presents models for moving forward Ultimately Kellert views our fractured relationship with nature as a design problem rather than an unavoidable aspect of modern life and he proposes many practical and creative solutions for cultivating a more rewarding experience of nature in our built environment **Architectural Regionalism**

Vincent B. Canizaro, 2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism But despite its omnipresence in contemporary practice and theory architectural regionalism remains a fluid concept its historical development and current influence largely undocumented This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term Authored by important critics historians and architects such as Kenneth Frampton Lewis Mumford Sigfried Giedion and Alan Colquhoun *Architectural Regionalism* represents the history of regionalist thinking in architecture from the early twentieth century to today

Writing Urbanism Douglas Kelbaugh, Kit McCullough, 2008-05-17 A carefully crafted reader which represents the discipline's best thinking and promotes an understanding of the principles of urban design *Writing Urbanism* is the ideal volume for both architects and urban designers **World Architecture**, 1998 *Metropolis*, 2002 **The Architectural Review**, 1997 ECO-TEC: Architecture of the In-Between - Book 3 Amerigo Marras, 1999 These essays propose a fusion of technology and ecology Contributors include Felix Guattari and Neil Denari **AA Files**, 2001 **Education, Environmental Attitudes and the Design Professions** Traci R. Rider, 2006 **Proceedings of the ACSA Annual Meeting** Association of Collegiate Schools of Architecture, 2002 **Renzo Piano Building Workshop** Renzo Piano, 2007 This monograph focuses on Piano's most remarkable buildings such as the Pompidou Centre in Paris which he co designed with Richard Rogers and the Beyeler building in Switzerland **TRADE RIBA Journal**, 1997 Sustainable Architecture Valentina Frighi, Stanislav Kolisnychenko, 2022-08-05 Aggregated Book *Technology and Place* Steven A. Moore, 2001-07-15 Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm **Treehouses and Epiphytes** Andrew Thomas Wojciehowski, 2002
