

# ENZYMES

speed up chemical reactions in your body  
and lower activation rates

Think of enzymes like little workers that help you clean your room. It will get done **FASTER** and use **LESS** energy.

Enzymes only work in certain conditions. If you change those conditions, they will stop working. When an enzyme changes shape and stops working we say that it has denatured.

Label where the enzyme has denatured and where it is optimum.
