All 50 have a constitutionally defined responsibility to protect the public. From an engineering point of view as well as

many other professions this responsibility is met by the process of licensure and in our case the Professional Engineer License. Though there are different experience requirements for different states the meaning of the license is common. The licensee demonstrates academic competency in the Fundamentals of Engineering by examination Principles and Practices at PE time. The licensee demonstrates qualifying work experience at PE time. The licensee ascribes to the Code of Ethics of the NSPE and to the laws of the state of registration. Having presented these qualities the licensee is certified as an Intern Engineer and the state involved has fulfilled its constitutionally defined responsibility to protect the public. This practice exam contains 80 problems we created that we believe are an excellent representation of the test. Looking back we can see that working problems similar to the exam was the most beneficial thing we did to prepare. They got us familiar with the structure of the PE exam and showed us which topics we needed to study more unfortunately most of the materials we used to study had practice problems that were either too complicated in strange formats or led us to study unnecessary concepts. In other words this is the study material that we wish we had while studying for the exam. *Personal and Career Development in Engineering* Open University T191/Study guide, 2010 **The Engineering Student Survival Guide** Krista Donaldson, 1999 The Engineering College Survival Guide provides introductory engineering students with applicable and useful life strategies to guide them along their undergraduate education in engineering.
