Harris,2005 *Economic Justice Race Gender Identity and Economics* is a new casebook offered as a means to further the conversation between critical legal scholarship and law and economics The phrase economic justice signals the authors aim to engage these two cultures and to find the answer to questions such as What can economics tell us about democracy and the law What can theories of justice tell us about economic theory and the law Why is there no legal language of class in the United States and what might one look like *Economic Justice Race Gender Identity and Economics* also uses the problem of racial and gender injustice as a site to interrogate both critical theory and economic theory Just as race gender and class seem inextricably intertwined economic and critical analysis both seem crucial to unraveling the knot of racial and gender inequality *Changing Roles and Practices of Bus Field Supervisors* Gayland K. Moffat,Transit Cooperative Research Program,National Research Council (U.S.). Cultural Economics Emma Coleman Jordan, Angela P. Harris, 2006 This book provides an always fascinating exploration of culture race gender and identity in the marketplace providing a structured conversation about some of the most difficult issues of the economic valuation of culture and indeed the very meaning of cultural subordination We consider four central questions Can economic behavior be understood without an attentive account of the cultural context in which economic transactions occur We criticize the failure of neoclassical economics to integrate explicitly the cultural variables of ordinary life into the models of economic measurement and the assumptions of economic reasoning We argue that these thin models are devoid of the important differences of culture language and identity We identify instead a more complex set of ideas that incorporate culture and its tension with commerce What is the impact of racial dominance on the ownership and control of cultural property Do the financial arrangements in the entertainment industry determine whether racial and cultural minorities will ever achieve self sufficiency We are fascinated by the artists whose labor as musicians painters singers songwriters and actors enrich our daily lives Yet these cultural stars often live lives of economic desperation after their turn in the spotlight has ended What is the effect of royalty payment systems is and of corporate structures that frequently under compensate and even cheat these aging stars of the current revenue generated by the contributions they made in their youth Lastly attention is given to the dynamics of the market valuation of the human capital components of language hairstyle sexual difference and culturally significant garb Does control of these modes of expressive autonomy depress the wages and opportunities for advancement of workers who do not choose to assimilate with the dominant culture More important are cultural styles associated with subordinated groups so devalued by the majority that non assimilationists must pay an economic penalty for their personal preference to seek harmony between their inner lives and their outer appearance

Why Spiritual Capital Matters Craig E. Mattson, 2021-05-21 When personal life splinters from professional life as it does for so many people today we often hold forth a vision of human life in which everything fits together work family community and the common good

Organizational leaders love this dream because frankly when people bring their whole selves to work they are more productive What s good for the company in this case looks to be good for the staff member too And that s no small accomplishment in a time when pandemic and racial inequity have made organizational leadership so economically and socially challenging But all too often this dream of holistic living and work relies too heavily upon the inner resources of individuals The result is burnout as leaders grow fatigued and team members feel manipulated This book s research among social entrepreneurs with close attention to the experience of entrepreneurs of color suggests that workplace communities have the economic and social resources needed for commonwealth But the goods remain latent Instead of obsessing about what individual inwardness can do we should catalyze those latent resources This book shows leaders how to start new conversations and tell new stories in order to cultivate spiritual capital and activate those latent goods
