Documentary Expression And Thirties America:

Documentary Expression and Thirties America William Stott, 1976 A comprehensive inquiry into the attitudes and ambitions that characterized the documentary impulse of the thirties The subject is a large one for it embraces among much else radical journalism academic sociology the esthetics of photography Government relief programs radio broadcasting the literature of social work the rhetoric of political persuasion and the effect of all these on the traditional arts of literature painting theater and dance The great merit of Mr Stott's study lies precisely in its wide ranging view of this complex terrain Hilton Kramer New York Times Book Review Scott might be called the Aristotle of documentary No one before him has so comprehensively surveyed the achievement of the 1930s suggesting what should be admired what condemned and why no one else has so persuasively furnished an aesthetic for judging the form Times Literary Supplement

Going to the Countryside Yu Zhang, 2020-03-03 Since the beginning of the twentieth century modern Chinese intellectuals reformers revolutionaries leftist journalists and idealistic youth had often crossed the increasing gap between the city and the countryside which made the act of going to the countryside a distinctively modern experience and a continuous practice in China Such a spatial crossing eventually culminated in the socialist state program of down to the villages movements during the 1960s and 1970s What then was the special significance of going to the countryside before that era Going to the Countryside deals with the cultural representations and practices of this practice between 1915 and 1965 focusing on individual homecoming rural reconstruction revolutionary journeys to Yan'an the revolutionary going down to the people as well as going to the frontiers and rural hometowns for socialist construction As part of the larger discourses of enlightenment revolution and socialist industrialization going to the countryside entailed new ways of looking at the world and ordinary people brought about new experiences of space and time initiated new means of human communication and interaction generated new forms of cultural production revealed a fundamental epistemic shift in modern China and ultimately created a new aesthetic social and political landscape As a critical response to the urban turn in the past few decades this book brings the rural back to the central concern of Chinese cultural studies and aims to bridge the city and the countryside as two types of important geographical entities which have often remained as disparate scholarly subjects of inquiry in the current state of China studies Chinese modernity has been characterized by a dual process that created problems from the vast gap between the city and the countryside but simultaneously initiated constant efforts to cope with the gap personally collectively and institutionally The process of crossing two distinct geographical spaces was often presented as continuous explorations of various ways of establishing the connectivity interaction and relationship of these two imagined geographical entities Going to the Countryside argues that this new body of cultural productions did not merely turn the rural into a constantly changing representational space most importantly the rural has been constructed as a distinct modern experiential and aesthetic realm characterized by revolutionary changes in human conceptions and sentiments *Documenting America, 1935-1943*

Howells, Robert Matson, 2009-05-16 What do we mean by visual evidence How should we interpret visual texts and what can they tell us Why is visual literacy so important and what benefits does it offer Visual evidence encompasses a diverse range of media from painting cartoons and photography to film television and documentary The central argument of this book is that visual evidence is a key to understanding both history and the present day and should not be relegated to a supporting role as merely illustrating the written word The book shows students scholars and researchers how to read the visual media to elicit meaning As primary sources visual texts can be studied not only for what is directly depicted in the painting or film but also for what it tells us about the people cultures and societies that made them Each chapter features fascinating case studies and examples which situate theory in real life A major appeal of the book is the wealth of illustrations and photographs of visual texts which are included throughout The authors make detailed reference to these examples to illustrate the theory surrounding visual evidence An intriguing case study of an unknown girl's photo album is just one of many examples offered showing how we can analyze and learn from the visual text This comprehensive and insightful edited collection brings together international media and cultural theorists historians and art historians to demonstrate the value of visual evidence not only to media and cultural studies but also to history the general humanities and the social sciences
