

electrical system

Your Headlights are the new "Bull's Eye" Sealed Beam type for better illumination. If they ever become damaged or burned out, your Dodge dealer can install an inexpensive sealed beam replacement unit for you.

In the event any other light bulbs burn out, see light bulb chart in specifications section for proper bulb replacement.

Your Dodge main light circuits are equipped with circuit breakers which open automatically before damage occurs. They'll continue to open and close until you have the trouble corrected. Then they automatically return and stay in closed position.

Your Dodge Battery should be kept clean and dry. Also, the terminals of the battery cable should be kept coated with petroleum jelly. If you'll check battery level and add water at least once a week in hot weather and every two weeks in winter, you'll materially extend the life of your battery.

CAUTION . . . Never allow an open flame or an electric spark to be brought near battery vent openings. When the battery is charging, a mixture of hydrogen and free oxygen is formed. These gases explode when ignited!

Your Dodge Generator requires little maintenance. Front and rear bearings should be lubricated with several drops of light machine oil every 1,000 miles. Have your Dodge dealer do this for you.

Your Spark Plugs—The spark plugs in any car are expendable. When inspection shows your spark plugs cannot be reconditioned, have them replaced with MoPar Resistor-type Plugs. For efficient service, we know you'll always keep them cleaned and in adjustment.

Your Horn is connected through the ignition switch so it can't operate when the switch is turned off. You'll appreciate this feature if you have children!

Tune-up—Top engine performance and economy depend in large measure on your electrical system being in good condition. Have your Dodge dealer check your electrical system every 6,000 miles for tip-top performance.

sure, safe braking

You'll find you might need occasional brake adjustment from time to time to compensate for normal brake lining wear. But that's the only attention your brakes need until you've driven many thousands of miles, when it may become necessary to re-line your brakes! When you step on the brake pedal, if it goes

more than half-way to the floorboard in making ordinary stops, you'll know it's time to see your Dodge dealer for a brake adjustment.

POORLY ADJUSTED BRAKES CAN PROVE COSTLY IN SUDDEN EMERGENCIES.

Your Dodge brakes use Cyclebond lining which gives much longer lining life. But when the brake lining is worn beyond safe limits, you should re-line the brake shoes to avoid damage to brake drums and assure safe stops. Let your Dodge dealer check your brake linings periodically and install MoPar Shoe Facerings which are prepared for bonding if needed.

Brake Fluid—Have the brake fluid level in the master cylinder checked periodically and whenever brakes show adjustment is required. For maximum safety, use only MoPar Super Brake Fluid.

CAUTION . . . When driving on slippery pavements, drive carefully. Apply your brakes gently with a pumping action. This will cut down the possibility of skidding. **IN CASE YOU SKID, ALWAYS STEER IN THE DIRECTION THE CAR IS SKIDDING UNTIL THE CAR IS UNDER CONTROL.** Use your brakes sparingly!

independent parking brake

Your new Dodge is equipped with a parking brake that operates independently from the service brakes. That means you have an auxiliary braking system for use in any emergency. This parking brake has the highest braking and holding power in the industry.
