Parent Engagement in Early Learning Julie Powers, 2016-03-07 This second edition of Parent Friendly Early Learning brings to life real scenarios that care providers face in today's world. We know parent engagement is important for a child's success, but how do you turn parent-provider relationships into partnerships? Learn how to improve parent-teacher communication, deal with family issues and special complications, and how to work with the modern family. Julie Powers has worked with children, families, educators, and communities for over forty years. She started preschool programs at the Dodge Nature Center in St. Paul, Minnesota; an inclusion-based program for Catalina Foothills School District in Tucson, Arizona; and was a consultant for the Air Force Child Development Centers. She has taught at colleges across the country and is currently an associate professor of early childhood education at University of Hawaii Maui College.

Early Learning and Development Marilyn Fleer, Mariane Hedegaard, 2010-04-19 Early Learning and Development provides a unique synthesis of cultural-historical theory from Vygotsky, Elkonin, and Leontiev in the twentieth century to the ground-breaking research of scholars such as Siraj Blatchford, Kratochvíl, and Hedegaard today. It demonstrates how development and learning are culturally embedded and institutionally defined, and it reflects specifically upon the implications for the early childhood profession. Divided into parts with succinct chapters that build upon knowledge progressively, the everyday lives of children at home, in the community, at pre-school, and at school are discussed in the context of child development and pedagogy. The book explicitly problematizes the foundations of early childhood education, inviting postgraduate researchers and academics to drill down into specific areas of international discourse and extending upper-level undergraduates beyond the fundamental underpinnings of their learning. Ultimately, Early Learning and Development offers new models of conceptual play practice and theory within a globally resonant cultural-historical framework.

Eager to Learn National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on Early Childhood Pedagogy, 2001-01-22 Clearly, babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers and learners every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? Eager to Learn explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators. Findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition, and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are

presented in the areas of the teacher child relationship the organization and content of curriculum meeting the needs of those children most at risk of school failure teacher preparation assessment of teaching and learning and more The book discusses Evidence for competing theories models and approaches in the field and a hard look at some day to day practices and activities generally used in preschool The role of the teacher the importance of peer interactions and other relationships in the child s life Learning needs of minority children children with disabilities and other special groups Approaches to assessing young children s learning for the purposes of policy decisions diagnosis of educational difficulties and instructional planning Preparation and continuing development of teachers Eager to Learn presents a comprehensive coherent picture of early childhood learning along with a clear path toward improving this important stage of life for all children
