Pollan,Mark Levine,2009-09-26 This invaluable guide offers a definitive game plan for anyone seeking to redefine his or her work status for finding a new career or even starting a personal business      **Hiring the Best Knowledge Workers, Techies & Nerds** Johanna Rothman,2013-07-15 This is the digital version of the printed book Copyright 2004 Proven Methods for Attracting Interviewing and Hiring Technical Workers Good technical people are the foundation on which successful high technology organizations are built Establishing a good process for hiring such workers is essential Unfortunately the generic methods so often used for hiring skill based staff who can apply standardized methods to almost any situation are of little use to those charged with the task of hiring technical people Unlike skill based workers technical people typically do not have access to cookie cutter solutions to their problems They need to adapt to any situation that arises using their knowledge in new and creative ways to solve the problem at hand As a result one developer tester or

technical manager is not interchangeable with another. This makes hiring technical people one of the most critical and difficult processes a technical manager can undertake. Hiring the Best Knowledge Workers: Techies, Nerds, The Secrets Science of Hiring Technical People takes the guesswork out of hiring and diminishes the risk of costly hiring mistakes. With the aid of step by step descriptions and detailed examples you will learn how to write a concise targeted job description, source candidates, develop ads for mixed media, review resumes quickly to determine Yes, No, or Maybe candidates, develop intelligent nondiscriminatory interview techniques, create fool proof phone screens, check references with a view to reading between the lines, extend an offer that will attract a win-win acceptance or tender a gentle but decisive rejection, and more. An effective hiring process is crucial to saving an organization the costs and consequences of a bad hiring decision. Not only is a bad hire costly in terms of recruiting expenses and the time spent hiring it, it can also bog down or derail projects that may already be running late. You, your team, and your organization will live with the long term consequences of your hiring decision. Investing time in developing a hiring strategy will shorten your decision time and the ramp up time needed for each new hire. Technical leaders, project and program managers, and anyone putting together a team of technical workers will greatly benefit from this book.

**Hiring Geeks That Fit** Johanna Rothman, 2013-02-15. Do you want to hire great people? Not sure how? Read this book. Knowledge workers, your geeks, are different from skill-based staff. So you should hire them differently. You need to analyze your situation, determine the problems you have, understand your culture, and then you can hire the right kinds of people. Cultural fit is critical because we rarely fire people based on technical skill. But we frequently fire them because of that elusive fit. And that's an expensive proposition. Hiring great geeks forces you to recognize and match culture, non-technical qualities, preferences, and skills, and finally technical skills. These people will adapt their knowledge to your specific situation, the context. They are the sum of both what they know and how they apply that knowledge to the product. As a result, one developer, tester, or technical manager is not interchangeable with another. This makes hiring technical people one of the most critical and difficult processes a technical manager or team can undertake. Hiring Geeks That Fit takes the guesswork out of hiring and reduces the risk of costly hiring mistakes. You will learn how to develop a hiring strategy so you know how to solve your problem. Analyze the job so the job description and ad falls out of the analysis. I. Source candidates using a variety of approaches including LinkedIn and Twitter. Develop effective ads for different mediums. Review resumes quickly to determine Yes, No, or Maybe candidates. Develop behavior description questions and auditions. Create phone screens that help you know who to bring in for an in-person interview. Make the most of an in-person interview. Check references. Extend an offer that will attract a win-win acceptance or tender a gentle but decisive rejection. Create a great first day experience for new hires. Learn how to create a buddy system to decrease the cost of a new hire. What to do if you can't find someone. You, your team, and your organization will live with the long term consequences of your hiring decision. Investing the time for you and your team in how to hire and interview will pay off fast.
