operations were purely domestic Areas of conflict include particularly the taxation of foreign profits the deduction of foreign losses the elimination of international double taxation and the attribution of profits to permanent establishments This dissertation analyses this conflict on the basis of a study of the case law of the European Court of Justice as well as some of the key provisions of the European treaties It appears that both the fiscal principle of territoriality and the principle of worldwide taxation give rise to complex issues of compatibility with the law of the European Union Although the analysis conducted throughout the dissertation provides some guidance for the taxation of the foreign business income of companies it is concluded that the Court cannot by itself efficiently resolve the conflict between such taxation and the objective of achievement of the internal market
