## **Experiential Therapies For Eating Disorders:**

**Experiential Therapies for Eating Disorders** Lynne M. Hornyak, Ellen K. Baker, 1989-03-24 It should not surprise us that so many are finding unique value in the experiential techniques. The fact that eating disordered patients adopt physical and often complex metaphoric means of expressing their emotional pain suggests the difficulty we are likely to encounter in asking them to articulate the inarticulable. In moving to spatial kinesthetic and symbolic expression we are in a sense agreeing to speak the patient's language rather than our own. Given the very nature of eating disorders many clinicians are finding that experiential methods are particularly applicable for treating patients who suffer from them. Providing a valuable new tool for practitioners **EXPERIENTIAL THERAPIES FOR EATING DISORDERS** is the first text to focus solely on the application of expressive therapies and experiential techniques to the treatment of anorexia nervosa and bulimia. Each chapter of this innovative work systematically reviews a single experiential treatment approach. Among these are guided imagery, hypnosis, structured eating, family sculpting, psychodrama, and gestalt therapy, dance movement therapy, art therapy, music therapy, and metaphor poetry therapy. Throughout important clinical issues that often accompany eating disorders also are addressed, including such topics as self-awareness, self-esteem, autonomy, identity, impulse regulation, affect modulation, body image, and interpersonal relationships. Countertransferential issues are examined and areas needing further exploration, such as father's role in the development of eating disorders, the hypnotizability of eating disordered patients, and the role of family in the treatment process, are delineated. The contributing authors, experienced practitioners from a variety of disciplines, systematically establish the theoretical framework of each treatment approach, fully describe specific techniques, and then consider their practical applications in both inpatient and outpatient settings, providing numerous case examples for illustration. They also offer helpful recommendations for incorporating these techniques into ongoing treatment plans. **EXPERIENTIAL THERAPIES FOR EATING DISORDERS** a valuable clinical resource for psychologists, psychiatrists, and all mental health professionals called on to treat patients suffering from anorexia and bulimia nervosa. This innovative work illustrates the use of guided imagery, hypnosis, structured eating, family sculpting, psychodrama, and gestalt therapy, and dance movement, art, music, and metaphor poetry therapy in the treatment of anorexia and bulimia nervosa. Systematically presented are the theoretical framework of each treatment approach, specific techniques, and their practical applications, illustrated by numerous case examples. All professionals who treat clients with eating disorders will find this volume a most valuable clinical resource.

*The Creative Therapies and Eating Disorders* Stephanie L. Brooke, 2008 *Creative Therapies with Eating Disorders* is a comprehensive work that examines the use of art, play, music, dance, movement, drama, and spirituality to treatment issues relating to eating disturbance. The author's primary purpose is to examine treatment approaches which cover the broad spectrum of the creative art therapies. The collection of chapters is written by renowned, well-credentialed and professional creative art therapists in the areas of art, play, music, dance, movement, and drama. In addition, some of the

chapters are complimented with photographs of client art work diagrams and

**Selecting Effective Treatments** Linda Seligman, Lourie W. Reichenberg, 2007-09-28 This thoroughly revised and updated version of Linda Seligman's classic book *Selecting Effective Treatments* presents a comprehensive systematic research based approach to the diagnosis and treatment of all the major mental disorders found in the Diagnostic and Statistical Manual of Mental Disorders. This third edition includes the most current information and expands the understanding of pervasive developmental disorders, bipolar disorder, disorders of childhood, schizophrenia, spectrum disorders, and eating disorders. In addition, the book expands on the sections that deal with the treatment of depression, borderline personality disorder, and more. This important resource also includes new information on assessment, the treatment of dual diagnosis, the spectrum concept of mental disorders, suicide risk factors, and new approaches to treatment. Filled with numerous illustrative case studies and helpful examples, the book organizes the relevant current literature on the treatment of the major mental disorders into a carefully structured format that helps clinicians to quickly assess the client and confidently develop treatment plans that are likely to succeed. *Selecting Effective Treatments* enables therapists to assess their level of effectiveness, increase accountability, work more effectively in today's managed care environment, and improve the overall quality of their work. Praise for the Prior Edition: The clear linkage of complex research-based diagnoses with practical therapeutic interventions is best spelled out in this book. There is nothing better to read on this subject; a must for all professionals and students in the mental health field. Fred Bemak, professor, counseling and development, College of Education and Human Development, George Mason University. Dr. Linda Seligman's book is an outstanding reference for all mental health professionals. This excellent revision, with the new chapter dealing with children, insures that diagnosis and treatment are considered within a truly lifespan approach. Thomas H. Hohenshil, Ph.D., professor of counselor education and psychology, Virginia Tech. Linda Seligman, professor, practitioner, and researcher, shows her skill in connecting diagnosis to treatment. She writes in a way that is down to earth and user friendly. This information will enable counselors and therapists to increase both their efficiency and their effectiveness and thus remain viable members of the helping professions in the twenty-first century. Robert E. Wubbolding, Ed.D., professor, Counseling Programs, Xavier University.
