Experiments In Practice Astrid Schwarz:

Experiments in Practice Astrid Schwarz, 2015-10-06 Traditionally experimentation has been understood as an activity performed within the laboratory but in the twenty first century this view is being challenged Schwarz uses ecological and environmental case studies to show how scientific experiments can transcend the laboratory **The Mysterious Science**

of the Sea, 1775-1943 Natascha Adamowsky, 2015-10-06 The depths of the oceans are the last example of terra incognita on earth Adamowsky presents a study of the sea arguing that contrary to popular belief post Enlightenment discourse on the sea was still subject to mystery and wonder and not wholly rationalized by science *Reasoning in Measurement* Nicola

Mößner, Alfred Nordmann, 2017-03-16 This collection offers a new understanding of the epistemology of measurement The interdisciplinary volume explores how measurements are produced for example in astronomy and seismology in studies of human sexuality and ecology in brain imaging and intelligence testing It considers photography as a measurement technology and Henry David Thoreau's poetic measures as closing the gap between mind and world By focusing on measurements as the hard won results of conceptual as well as technical operations the authors of the book no longer presuppose that measurement is always and exclusively a means of representing some feature of a target object or entity Measurement also provides knowledge about the degree to which things have been standardized or harmonized it is an indicator of how closely human practices are attuned to each other and the world **Standardization in Measurement**

Oliver Schlaudt, Lara Huber, 2015-10-06 The application of standard measurement is a cornerstone of modern science In this collection of essays standardization of procedure units of measurement and the epistemology of standardization are addressed by specialists from sociology history and the philosophy of science Environments of Intelligence Hajo Greif, 2017-09-01 What is the role of the environment and of the information it provides in cognition More specifically may there be a role for certain artefacts to play in this context These are questions that motivate 4E theories of cognition as being embodied embedded extended enactive In his take on that family of views Hajo Greif first defends and refines a concept of information as primarily natural environmentally embedded in character which had been eclipsed by information processing views of cognition He continues with an inquiry into the cognitive bearing of some artefacts that are sometimes referred to as intelligent environments Without necessarily having much to do with Artificial Intelligence such artefacts may ultimately modify our informational environments With respect to human cognition the most notable effect of digital computers is not that they might be able or become able to think but that they alter the way we perceive think and act The Open Access version of this book available at <http://www.tandfebooks.com> doi: 10.4324/9781315401867 has been made available under a Creative Commons CC BY licence Scientists' Expertise as Performance Joris Vandendriessche, Evert Peeters, Kaat Wils, 2015-10-06 The essays in this collection explore our reliance on experts within a historical context and across a wide range of fields including agriculture engineering health sciences and labour management Contributors argue that experts
