Fried, Robert Rosenberger, 2021-07-12 How should we understand the experience of encountering and interpreting images What are their roles in science and medicine How do they shape everyday life Postphenomenology and Imaging How to Read Technology brings together scholars from multiple disciplines to investigate these questions The contributors make use of the postphenomenological philosophical perspective applying its distinctive ideas to the study of how images are experienced These essays offer both philosophical analysis of our conception of images and empirical studies of imaging practice Edited by Samantha J Fried and Robert Rosenberger this collection includes an extensive primer chapter introducing and expanding the postphenomenological account of imaging as well as a set of short pieces by critical respondents prominent scholars who may not self identify as doing postphenomenology but whose adjacent work is illuminating

Good Question Michael Emme, 2017-09-14 Good Question is a textbook intended for children and youth teachers and researchers interested in doing collaborative research in their community The volume starts out as comic book research methods textbook that intends to introduce children and youth to the fundamental structure of the research process its elements and steps as well as with the research activities associated with the different aspects of research practice in general and arts based image based research in particular This unique approach allows children and youth to learn the craft of research in a playful

way and to become knowledgeable and competent co researchers with adults contributing to all phases of the study s design The volume encourages teachers and researchers to see the important role of play in teaching children and young people about the research process and gives them the tools to engage children and youth in playful arts based image based inquiries The complexity of exploring collaborative research required an innovative way of overcoming the linearity of a paper bound print text and the way we read it The volume is intentionally organized in three sections starting with the comic book because it invites an openness to layered non linear research literacy The volume also includes an anthology of research examples of conducting arts based image based research with children and several theoretical essays focused on play as research and collaborative arts based image based research The later sections featuring research examples and theory though heavily illustrated have been peer reviewed and formatted more in the academic tradition Thus Good Question represents an attempt to make sense of children s play ful engagement in arts based image based inquiry activities with adults as research By playing with the forms and traditions of the comic book the research methods textbook and the academic book together we have attempted to respectfully disassemble and reassemble book form We invite readers to discover those research conventions that are capable of establishing what is gathered and presented here as collaborative research with children We imagine this volume contributing to the quest e for new ways of living together of generating more and more incisive and inclusive dialoguese Greene 1994 p 459 as both a personal and a collective endeavor

and male sexuality in addition to a growing literature exploring female embodiment Missing from the current literature however is a sustained analysis of the phenomenology of male gendered bodies *Revealing Male Bodies* addresses this omission by examining how male bodies are physically and experientially constituted by the economic theoretical and social practices in which men are immersed Contributors include Susan Bordo William Cowling Terry Goldie Maurice Hamington Don Ihde Greg Johnson Björn Krondorfer Alphonso Lingis Patrick McGann Paul McIlvenny Terrance MacMullan Jim Perkinson Steven P Schacht Richard Schmitt Nancy Tuana Craig L Wilkins and John Zuern *Echoes and Reflections* Lance Strate, 2006 The author describes the interdisciplinary communication centered field of media ecology the study of media as environments a field that encompasses the study of technology symbol systems and aesthetic form in addition to traditional conceptions of media and mediation This book provides the first comprehensive overview of the field followed by a case study concerning the relationship between modes of communication and constructions of the self **История философии** ,2000 **Revue philosophique de la France et de l'étranger** ,2001 *Hermeneutics and Truth* Brice R. Wachterhauser, 1994-07-06 The claim that all human thought involves interpretation that all human thought is in some way relative to a contingent context of cognitive theoretical practical and aesthetic considerations has become widely accepted but what we understand by truth and how we should best pursue it are questions raised with renewed force once a hermeneutical starting point has been embraced Brice R Wachterhauser's collection *Hermeneutics and Truth* is an attempt to contribute to this conversation No thinkers have wrestled with the issue of truth and interpretation in more illuminating ways for the Continental tradition of philosophy than Heidegger and Gadamer *Hermeneutics and Truth* is a dual focus on Heidegger and Gadamer but it concentrates primarily on Gadamer's efforts to think through the issue of truth for hermeneutics and only secondarily on Heidegger's thought on this issue *Philosophical Hermeneutics* Hans-Georg Gadamer, 1977 This volume presents carefully selected essays from Gadamer's *Kleine Schriften* The seven essays comprising Part 1 contain Gadamer's discussion of hermeneutical reflection Part 2 consists of six essays dealing with phenomenology existential philosophy and philosophical hermeneutics *Hermeneutics and Science* Márta Fehér, O. understanding of science Explorations in Phenomenology David Carr, E.S. Casey, 1974-01-31 Contrary to popular belief professional philosophers want and need to be heard Lacking a large and general public in this country they turn to audiences of peers and rivals But these audiences are found either in giant unfocused professional bodies or in restrictive groups of specialists In this respect the Society for Phenomenology and Existential Philosophy can claim a unique role among academic organizations in this country Now in its tenth year it has become one of the most important forums in America for the open exchange of ideas The Society has grown considerably since its founding and its annual meetings attract scholars in philosophy and other disciplines from across the country and abroad But these meetings differ markedly from others too large to be dominated by any single clique or doctrine they are at the same time small enough to encourage lively discussion within its organized sessions and not just in the corridors outside The Society derives its focus from the two closely allied philosophical directions indicated in its title Yet from the beginning it has included in its meetings a sizeable number of contributors who are not identified with or even sympathetic to these directions but are at least willing to engage in a dialogue with those who are Furthermore the Society has accomplished to a limited degree something rare indeed in American intellectual life an interdisciplinary exchange Hermeneutics and Deconstruction Hugh J. Silverman, Don Ihde, 1985-09-30 Hermeneutics and Deconstruction provides an assessment of two dominant modes of thinking and writing in continental philosophy today It addresses central issues in the theory of interpretation and in the strategies of textual reading Placed in the context of contemporary philosophical practice this volume raises the question of the end of philosophy and offers different ways of understanding how the question of closure in philosophy can itself open up a whole range of philosophical activities Special attention is given to the practice of interpretation in the areas of science perception and literature and to the dimensions of hermeneutic understanding with respect to being life and the world An investigation of how history is interpreted and read as a text provides access to one of the significant differences between hermeneutic understanding and deconstructionist practice A section is devoted to the controversy concerning the value and the achievement of deconstruction The writings of Heidegger and Derrida are juxtaposed and examined And the volume concludes with several indications of new directions in continental philosophy and various versions of what a post Derridean reading might entail
