Restorative Urbanism Kevin Thwaites, Alice Mathers, Ian Simkins, 2013-08-22 The need for a human orientated approach to urbanism is well understood and yet all too often this dimension remains lacking in urban design In this book the authors argue for and develop socially restorative urbanism a new conceptual framework laying the foundations for innovative ways of thinking about the relationship between the urban spatial structure and social processes to re introduce a more explicit people centred element into urban place making and its adaptation Focusing on this interplay between humans and the built environment two new concepts are developed the transitional edge a socio spatial concept of the urban realm and Experiemics a participative process that acts to redress imbalances in territorial relationships defined in terms of the

awareness of mine theirs ours and yours MTOY In this way Socially Restorative Urbanism shows how professional practice and community understanding can be brought together in a mutually interdependent and practical way Its theoretical and practical principles are applicable across a wide range of contexts concerning human benefit through urban environmental change and experience and it will be of interest to readers in the social sciences and environmental psychology as well as the spatial planning and design disciplines

Chinese Urban Design Fei Chen, Kevin Thwaites, 2018-01-12 The traditional Chinese city is undergoing an identity crisis With the rapid development taking place there is growing conflict between this new building and the existing urban heritage An appropriate approach both in design and in legislation is urgently needed to deal with this problem Furthermore although Chinese cities have a remarkably long history existing methods of urban form study in China are either descriptive or loosely structured whereas a comprehensive methodology is necessary to read Chinese urban forms in a consistent way and thus inform designers and policy makers Chinese Urban Design targets these problems and offers an analytic and conceptual framework for both urban investigation and consequent design Firstly summarising traditional urban design principles and how Chinese cities have transformed over time it then introduces and offers a theoretic ground and scientific methodology for understanding the evolution of urban forms initially developed in western countries It demonstrates the theoretic model via real cases from the city of Nanjing and establishes a direct link between understanding of urban forms and design development By providing a cross cultural investigation on the theories and methods of urban typology and morphology this book aims to suggest best future practice for urban design in China It explores how urban designers and local policy makers can produce culturally responsive designs and how they might better understand the formation and transformation of the built environment in which their creations sit It also looks at how local residents lifestyle culture and demands might be reflected and respected in design process
