**The Psychotherapy Relationship** Charles J. Gelso,Jeffrey A. Hayes,1998-08-27 Human beings are social creatures and from the moment we enter the world our personal horizons are defined by our relationships with others Parents siblings teachers friends lovers colleagues even the countless strangers with whom we interact during the course of any given day we exist through them and they through us This book is concerned with one of the most profound yet difficult to define of human relationships the healing relationship of psychotherapy There are many psychotherapeutic schools of thought and while they may vary considerably in theory and methodology virtually all agree that the relationship that develops between therapist and client is important to the success of treatment But how do you define a successful client therapist relationship How exactly does the psychotherapy relationship influence process and outcome What are its various components and which are most important to the healing process In this groundbreaking study Charles Gelso and Jeffrey Hayes provide answers to these and other challenging questions about The Psychotherapy Relationship The authors begin by defining the three main components of the psychotherapy relationship the working alliance transference configuration and the real relationship They then consider how each is generally defined by and functions within various psychotherapeutic approaches how each interrelates with the other two components within the context of the therapy relationship and how relationship components and therapeutic techniques interact during treatment Throughout the authors draw upon their extensive clinical experience to offer advice and guidance on how to avoid and overcome major obstacles to a successful psychotherapy relationship The remainder of the book is devoted to a fascinating in depth look at the psychotherapy relationship in action in four major psychotherapy schools psychoanalytic cognitive behavioral humanistic and feminist Ever mindful of important factional differences within schools of thought the authors explore the role of the relationship within each approach in terms of the centrality of the relationship whether the relationship is seen as a means to an end or an end in itself the extent to which the emphasis is on the real relationship versus the transference and the manner in which the therapist uses power in the relationship The most penetrating and far ranging exploration yet of this most crucial aspect of the psychotherapeutic process The Psychotherapy Relationship is must

reading for all psychotherapists A far ranging and insightful exploration of one of the most important and controversial aspects of the psychotherapeutic process The Psychotherapy Relationship is an impartial research based exploration of the role of the client therapist relationship in most major approaches to psychotherapy Drs Gelso and Hayes break the relationship down into its component parts including the working alliance transference countertransference and the real relationship and define the function of each as it interrelates with both the other two and with various intervention techniques They explore various theories about the nature and function of the therapy relationship espoused by the psychoanalytic cognitive behavioral humanistic and feminist schools of thought And they develop a broad based practical synthesis of theory research and personal clinical experience that all psychotherapists will find helpful in their efforts to assess and improve the quality of their relationships with their clients

**Psychoanalysis** Betty Cannon,1991 Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition Drawing upon Sartre s work as well as her own experiences as a practicing therapist she shows that Sartre was a fellow traveler who appreciated Freud s psychoanalytic achievements but rebelled against the determinism of his metatheory The mind Sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as Freud s work suggested Sartre advocated an existentialist psychoanalysis based on human freedom and the self s ability to reshape its own meaning and value Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs By comparing Sartre with Freud and influential post Freudians like Melanie Klein Otto Kernber Margaret Mahler D W Winnicott Heinz Kohut Harry Stack Sullivan and Jacques Lacan she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory In the process she adds a new dimension to our understanding of Sartre and his place in twentieth century philosophy
