Piotr Cap, Marta Dynel, 2017-06-30 Although the term implicitness is ubiquitous in the pragmatic scholarship it has rarely constituted the focus of attention per se This book aims to help crystallize the concept of implicitness by defining its linguistic boundaries as well as specifying and exploring its different communicative manifestations The contributions by leading specialists scrutinize the main conceptualizations forms and occurrences of implicitness such as implicature implicature explicature entailment presupposition etc at different levels of linguistic organization The volume focuses on phrasal sentential and discursive phenomena showcasing the richness and variety of implicit forms of communication systematizing where possible the existing analytic perspectives and identifying the most productive procedures for further exploration Taken together the chapters exhibit theoretical differences that hinder a consensus on the nature of implicitness but they simultaneously reveal methodological points of contact and raise common questions thereby signposting a future analytic agenda The book will appeal to both theoretically and empirically minded scholars working within and across the disciplines of Pragmatics Semantics Language Philosophy Discourse Analysis and Communication Studies *Macroprudential Policy Effects*
Nina Biljanovska, Sophia Chen, Mr. R. G Gelos, R. Gelos, Deniz Igan, Ms. Deniz O Igan, Maria Martinez Peria, Mr. Maria Soledad Martinez Peria, Erlend Nier, Mr. Fabian Valencia, 2023-03-31 The global financial crisis GFC underscored the need for additional policy tools to safeguard financial stability and ultimately macroeconomic stability Systemic financial vulnerabilities had developed under a seemingly tranquil macroeconomic surface of low inflation and small output gaps This challenged the precrisis view that achieving these traditional policy targets was a sufficient condition for macroeconomic stability Thus new tools had to be deployed to target specific financial vulnerabilities and to build buffers to cushion adverse aggregate shocks while allowing traditional policy levers including monetary and microprudential policies to focus on their traditional roles Macroprudential policy measures emerged as the solution to this gap Some of these measures had been used before the GFC mostly in emerging markets But it was only after the crisis that they were more widely adopted and the toolkit expanded This spurred a growing body of empirical research on the effects and potential shortfalls of these measures with a further deepening of this knowledge gaining importance as policymakers confront increased financial stability risks in the post pandemic world Recognizing that there still is much to learn this paper takes stock of our expanding understanding

about the effects and side effects of macroprudential measures by focusing on these questions What have we learned about the effects of macroprudential policy in containing the buildup of vulnerabilities What do we know about the effects on economic activity and resilience How do policy effects vary with conditions and over time How important are leakages and circumvention How do the effects on credit depend on other policies **ECAI 2020** Giuseppe De Giacomo,Bistra Dilkina,Michela Milano,Senén Barro,Alberto Bugarín,Jérôme Lang,2020-09-15 This book presents the proceedings of the 24th European Conference on Artificial Intelligence ECAI 2020 held in Santiago de Compostela Spain from 29 August to 8 September 2020 The conference was postponed from June and much of it conducted online due to the COVID 19 restrictions The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence PAIS 2020 held at the same time A record number of more than 1 700 submissions was received for ECAI 2020 of which 1 443 were reviewed Of these 361 full papers and 36 highlight papers were accepted an acceptance rate of 25% for full papers and 45% for highlight papers The book is divided into three sections ECAI full papers ECAI highlight papers and PAIS papers The topics of these papers cover all aspects of AI including Agent based and Multi agent Systems Computational Intelligence Constraints and Satisfiability Games and Virtual Environments Heuristic Search Human Aspects in AI Information Retrieval and Filtering Knowledge Representation and Reasoning Machine Learning Multidisciplinary Topics and Applications Natural Language Processing Planning and Scheduling Robotics Safe Explainable and Trustworthy AI Semantic Technologies Uncertainty in AI and Vision The book will be of interest to all those whose work involves the use of AI technology
