

Chapter 4: Geologic Time

Remember that geologists use two "languages of time": **Relative time** and **absolute time**. **Relative time** is the study of the order and extent of geological processes to give an approximate picture of geologic time. **Absolute time** is the study of the duration of the geological processes. **Relative time** is the study of the order and extent of geological processes to give an approximate picture of geologic time. **Absolute time** is the study of the duration of the geological processes. **Relative time** is the study of the order and extent of geological processes to give an approximate picture of geologic time. **Absolute time** is the study of the duration of the geological processes.

A. Relative dating

There are two methods of relative dating: **stratigraphic** and **chronological**. **Stratigraphic** is the study of the order and extent of geological processes to give an approximate picture of geologic time. **Chronological** is the study of the duration of the geological processes.

Principles for Relative Dating

1. Principle of Original Horizontality

This principle states that sediments are deposited in horizontal layers. If they are not horizontal, they have been tilted or folded. This is the basis for relative dating.
