Experimental Cognitive Psychology And Its Applications Decade Of Behavior:

Experimental Cognitive Psychology and Its Applications Alice F. Healy, 2005 The primary purpose of this volume is to bring together contributions by some of the most significant contemporary experimental psychologists working in cognition including the areas of learning memory information processing discourse and knowledge representation They share their perspectives and their recent research findings so that these ideas and results can be integrated for use by practitioners in the field including those in training education and testing Such integration should also be of value to students and other researchers concerned with the core issues of human cognition A secondary purpose of this volume is to serve as a triple Festschrift in honor of three distinguished faculty members from the University of Colorado CU who are recently retired from teaching at the university Lyle Bourne Jr Walter Kintsch and Thomas Landauer All three of these individuals throughout their careers have done basic research on a wide range of topics in experimental cognitive psychology In recent years all three have made important contributions to the understanding of learning memory information processing discourse and knowledge representation and findings from these studies have direct practical implications for training education and testing Overall the study of cognition has experienced rapid growth in the last decade This topic is fundamental both to the science of psychology and to its applications to real world problems However there has traditionally been a huge gap between the basic research findings in this area and practice in the field There thus remains a crucial need to bridge from the laboratory to the real world This volume brings together individuals who not only have a distinguished record as experimental psychologists but also have tried to show how their findings can be applied in the field Preface PsycINFO Database Record c 2005 APA all rights reserved

R. Gurung, Beth M. Schwartz, 2011-08-26 The scholarship of teaching and learning SoTL is one of the most dynamic areas of research in the field of higher education today in which faculty continuously evaluate the quality of their teaching and its affect on student learning Faculty are being held accountable for the effectiveness of their teaching and in turn they are starting to engage in SoTL related intellectual exchanges not only in their research agendas but also in the ways in which they teach their students in the classroom At the heart of this new movement there is a simple idea take a close look at how you teach and how your students learn use the same methodology that you would use for formal investigations be it in the humanities or sciences and hold your research to the same standards most notably peer review *Optimizing Teaching and Learning* will serve as a guide for anyone who is interested in improving their teaching the learning of their students and at the same time contribute to the scholarship of teaching and learning It bridges the gap between the research and practice of SoTL with explicit instructions on how to design conduct analyze and write up pedagogical research including samples of actual questionnaires and other materials e.g. focus group questions that will jumpstart investigations into teaching and learning It also explores the

advantages and disadvantages of various pedagogical practices and present applications of SoTL using case studies from a variety of disciplines This book will serve as an invaluable resource for both seasoned faculty and new faculty who are just beginning to assess their teaching methods and learn how to think beyond the content **Large-Scale Knowledge**

Resources. Construction and Application Takenobu Tokunaga, Antonio Ortega, 2008-02-29 At the start of the 21st century we are now well on the way towards a knowledge intensive society in which knowledge plays ever more important roles Thus research interest should inevitably shift from information to knowledge with the problems of building organizing maintaining and utilizing knowledge coming central issues in a wide variety of fields The 21st Century COE program Framework for Systematization and Application of Large scale Knowledge sources COE LKR conducted by the Tokyo Institute of Technology is one of several early attempts worldwide to address these important issues Inspired by this project LKR2008 aimed at bringing together diverse contributions in cognitive science computer science education and linguistics to explore design construction extension maintenance validation and application of knowledge Responding to our call for papers we received 38 submissions from a variety of research areas Each paper was reviewed by three Program Committee members Since we were aiming at an interdisciplinary conference covering a wide range of topics concerning large scale knowledge resources LKR each paper was assigned a reviewer from a topic area outside the main thrust of the paper This reviewer was asked to assess whether the authors described the motivation and importance of their work in a comprehensible manner even for readers in other research areas Following a rigorous reviewing process we accepted 14 regular papers and 12 poster papers
