## **Fast Cycle Time Fast Cycle Time:**

Fast Cycle Time Christopher Meyer, 2010-05-11 Today tens of thousands of companies are struggling to become time based competitors inspired by such corporations as Motorola General Electric Citicorp and a myriad of others who have cut production time in half or more But until now the literature has focused on the theory and philosophy of fast cycle time rather than the tools and techniques for implementing it Here for the first time Christopher Meyer an internationally recognized expert in cycle time reduction presents a step by step blueprint for transforming traditional companies into fast cycle competitors Meyer argues that fast cycle time is achieved not by working faster but by aligning the organization s purpose strategy and structure He demonstrates how the product development cycle must become a learning laboratory in which the four continuous elements Design Fabricate Assemble and Test are analyzed with the intent to improve strategy in the next business cycle Analyzing strategy and core processes enables management to detect and correct problems earlier and leverage knowledge for improved innovation and increased value for customers Employing an ongoing case study Core Products Inc throughout the text Meyer shows how to redesign the organization for manufacturability and assembly how to implement multifunctional teams that work how to analyze and map critical cycle time interdependencies such as co location and how to measure the impact of cycle time on business performance Meyer s practical approach provides a simple methodology for organizations to deliver products to customers rapidly accurately and reliably Chris Meyer interrelates many pieces that we have all read about in different places into a coherent guide to making it happen Ironically as Meyer shows implementing fast cycle time means almost the opposite of what most American managers are inclined to do Many years of practical experience have shown Meyer and his colleagues the wisdom of a paradox that to speed up you often have to slow down From the Foreword by Peter M Senge *Building Evolutionary Architectures* Neal Ford, Rebecca Parsons, Patrick Kua, Pramod Sadalage, 2022-11-22 The software development ecosystem is constantly changing providing a constant stream of new tools frameworks techniques and paradigms Over the past few years incremental developments in core engineering practices for software development have created the foundations for rethinking how architecture changes over time along with ways to protect important architectural characteristics as it evolves This practical guide ties those parts together with a new way to think about architecture and time **Computerworld** , 2000-01-10 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **DNA polymerases in Biotechnology** Zvi Kelman, Andrew F Gardner, 2015-03-18 DNA polymerases are core tools for molecular biology including PCR whole genome amplification DNA sequencing and genotyping Research has focused on discovery of novel DNA polymerases characterization of DNA polymerase biochemistry and development of new replication assays These studies have accelerated DNA polymerase
