National Association of Biology Teachers. National Conservation Committee,1959 How to Do Ecology Richard

Karban,Mikaela Huntzinger,2006-08-20 Most ecology books and courses focus on the facts and the concepts While these are essential many young ecologists need to figure out how to actually do research themselves How to Do Ecology provides nuts and bolts advice on how to develop a successful thesis and research program This book presents different approaches to posing testable ecological questions In particular it covers the uses strengths and limitations of manipulative experiments in ecology It will help young ecologists consider meaningful treatments controls replication independence and randomization in experiments as well as where to do experiments and how to organize a season of work This book also presents strategies for analyzing natural patterns the value of alternative hypotheses and what to do with negative results Science is only part of being a successful ecologist This engagingly written book offers students advice on working with other people and navigating their way through the land mines of research Findings that don t get communicated are of little value How to Do Ecology suggests effective ways to communicate information in the form of journal articles oral presentations and posters Finally it outlines strategies for developing successful grant and research proposals Numerous checklists figures and boxes throughout the book summarize and reinforce the main points In short this book makes explicit many of the unspoken assumptions behind doing good research in ecology and provides an invaluable resource for meaningful conversations among ecologists
