Gardens Robert Pogue Harrison, 2010-10 Humans have long turned to gardens both real and imaginary for sanctuary from the frenzy and tumult that surrounds them Those gardens may be as far away from everyday reality as Gilgamesh's garden of the gods or as near as our own backyard but in their very conception and the marks they bear of human care and cultivation gardens stand as restorative nourishing necessary havens With *Gardens* Robert Pogue Harrison graces readers with a thoughtful wide ranging examination of the many ways gardens evoke the human condition Moving from the gardens of ancient philosophers to the gardens of homeless people in contemporary New York he shows how again and again the garden has served as a check against the destruction and losses of history The ancients explains Harrison viewed gardens as both a model and a location for the laborious self cultivation and self improvement that are essential to serenity and enlightenment an association that has continued throughout the ages The Bible and Qur'an Plato's Academy and Epicurus's Garden School Zen rock and Islamic carpet gardens Boccaccio Rihaku Capek Cao Xueqin Italo Calvino Ariosto Michel Tournier and Hannah Arendt all come into play as this work explores the ways in which the concept and reality of the garden has informed human thinking about mortality order and power Alive with the echoes and arguments of Western thought *Gardens* is a fitting continuation of the intellectual journeys of Harrison's earlier classics *Forests* and *The Dominion of the Dead* Voltaire famously urged us to cultivate our gardens with this compelling volume Robert Pogue Harrison reminds us of the nature of that responsibility and its enduring importance to humanity

Essay on Gardens Claude-Henri Watelet, 2013-10-09 Published in 1774 *Essay on Gardens* is one of the earliest texts showing the progressive shift in French taste from the classical model of the gardens at Versailles to the picturesque or natural style of garden design in the late eighteenth century In this formulation of his ideas concerning landscape Claude Henri Watelet describes an ideal farm and also his own very real garden Moulin Joli near Paris He advances the theory that the useful and the pleasurable must be combined in the planning preservation and decoration of the land by offering a relatively novel design that uses experimental methods to create a comfortable estate The result is a horticultural and ecological laboratory that includes a residence a farm stables a dairy an apiary a mill walks vistas flower beds an area reserved for medicinal plants decorative statues a medical laboratory and even a small infirmary for ailing members of the community Given the wide scholarly interest in the field of garden design and its history this first English edition of Watelet's small but influential book will interest historians of landscape design as well as students of the history of architecture Joseph Dispenzio's informative introduction to Samuel Danon's masterful translation situates the *Essay on Gardens* within the framework of other landscape and garden treatises of the late eighteenth century Although the original text was not illustrated this edition includes a selection of charming drawings and etchings of Moulin Joli by Watelet himself Hubert Robert and others
