Finding Phoebe Changed Course Evolution:

    Finding Phoebe J. Anderson,2015-12-08 FINDING PHOEBE is a parable for our times By fertilizing animal eggs with human sperm Dr Phoebe Carlyle creates human animal hybrids Since creating the first ever cybrid her Little Cat Girl she is rumored to have created several more chimeras by mixing human cells with animal embryos Naturally she has become a notorious scientist considered to be every bit as unsavory as Dr Frankenstein Accused of playing God creating monsters part animal part human blurring the genetic distinctions between man and beast she is reported to be in hiding somewhere in Mexico This novel documents the author s attempts for more than 15 years to find her and tell her story   Evolutionary Thinking Across Disciplines Agathe du Crest,Martina Valković,André Ariew,Hugh Desmond,Philippe Huneman,Thomas A. C. Reydon,2023-06-26 This volume aims to clarify the epistemic potential of applying evolutionary thinking outside biology and provides a survey of the current state of the art in research on relevant topics in the life sciences the philosophy of science and the various areas of evolutionary research outside the life sciences By bringing together chapters by evolutionary biologists systematic biologists philosophers of biology philosophers of social science complex systems modelers psychologists anthropologists economists linguists historians and educators the volume examines evolutionary thinking within and outside the life sciences from a multidisciplinary perspective While the chapters written by biologists and philosophers of science address theoretical aspects of the guiding questions and aims of the volume the chapters written by researchers from the other areas approach them from the perspective of applying evolutionary thinking to non biological phenomena Taken together the chapters in this volume do not only show how evolutionary thinking can be fruitfully applied in various areas of investigation but also highlight numerous open problems unanswered questions and issues on which more clarity is needed As such the volume can serve as a starting point for future research on the application of evolutionary thinking across disciplines   **Evolution of Nervous Systems** Georg F. Striedter,Theodore H. Bullock,Todd M. Preuss,John Rubenstein,Leah A. Krubitzer,2016-11-23 Evolution of Nervous Systems Second Edition Four Volume Set is a unique major reference which offers the gold standard for those interested both in evolution and nervous systems All biology only makes sense when seen in the light of evolution and this is especially true for the nervous system All animals have nervous systems that mediate their behaviors many of them species specific yet these nervous systems all evolved from the simple nervous system of a common ancestor To understand these nervous systems we need to know how they vary and how this variation emerged in evolution In the first edition of this important reference work over 100 distinguished neuroscientists assembled the current state of the art knowledge on how nervous systems have evolved throughout the animal kingdom This second edition remains rich in detail and broad in scope outlining the changes in brain and nervous system organization that occurred from the first invertebrates and vertebrates to present day fishes reptiles birds mammals and especially primates including humans The book also includes wholly new content fully updating the chapters in the previous edition and offering

brand new content on current developments in the field Each of the volumes has been carefully restructured to offer expanded coverage of non mammalian taxa mammals primates and the human nervous system The basic principles of brain evolution are discussed as are mechanisms of change The reader can select from chapters on highly specific topics or those that provide an overview of current thinking and approaches making this an indispensable work for students and researchers alike Presents a broad range of topics ranging from genetic control of development in invertebrates to human cognition offering a one stop resource for the evolution of nervous systems throughout the animal kingdom Incorporates the expertise of over 100 outstanding investigators who provide their conclusions in the context of the latest experimental results Presents areas of disagreement and consensus views that provide a holistic view of the subjects under discussion **Data-Driven Ocean Environmental Perception with its Applications** Jianchuan Yin,Yu Jiang,Phoebe Koundouri,Hongde Qin,2025-05-27 Data driven ocean environmental perception refers to the various data driven methodologies used by researchers to study understand and explore the ocean for sustainable marine ecosystem the blue ocean economy and other ocean related activities Ocean environment perception techniques also pave the way for deep insight and full exploration of ocean resources such as coastal and marine ecosystem protection ocean vehicle operation and management and ocean energy utilization However it is hard for traditional data processing techniques to get comprehensive understanding of the ocean environmental information attributed to the complex characteristics of environmental information The traditional data processing techniques are facing challenges such as Unable to fully capture the non linearity and intrinsic uncertain of complex ocean systems Isolated systems are involved and make it difficult to integrate data from various sources Overwhelming for handling enormous amounts of data leading to performance issues and long processing times Costly in scalability both in terms of hardware and operational expenses Advances in data driven methodologies Highly dynamic nonlinearity and uncertainty mapping capability in complex system evolution Leveraging vast amounts of data collected from various sources effectively Flexibility in handling various types of data including structured semi structured and unstructured data Handling big data efficiently by making use of distributed computing and storage Data driven technologies are a set of techniques dealing with complex systems which can mine valuable potential relationships from measurement data through intelligent computational approaches such as machine learning data mining data fusion reinforcement learning etc Data driven applications on the aspect of Remote Sensing Autonomous Underwater Vehicles AUVs Remotely Operated Vehicles ROVs Acoustic Sensing Buoy Networks Internet of Things IoT for the oceans and Ocean Digital Twin are becoming increasingly crucial for ocean environmental perception leveraging vast amounts of data collected from various sources to monitor analyze and predict oceanic atmospheric and marine ecological conditions This helps us to identify and monitor environmental changes and better understand the complex relationships between different components of the ocean ecosystem It also provides essential ways to explore how people understand value or engage with marine environment and
