Finnish Architecture:

800 Years of Finnish Architecture James Maude Richards, 1978 **Finnish Architecture and the Modernist Tradition** Malcolm Quantrill, 2012-12-06 This is a unique and comprehensive study of the entire span of Finnish architecture in the 20th century Using comparative critical analysis the author weaves Aalto's contribution into his overview of the evolution of modern Finnish architecture and includes the work of a range of lesser published figures It will be of considerable interest to architects art historians and all those interested in modern Finnish architecture **Finland** Roger Connah, 2006-03-15 From museums to schools to subsidized housing developments Roger Connah's Finland is an important survey of the country's architecture **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Constructing a Legend** Petra Čeferin, 2003-01-01 For decades the international professional press has described Finland's architecture as characterized by clear cut forms logical use of natural materials attention to detail careful construction and sympathetic approach to the landscape In *Constructing a Legend* architect researcher Petra Čeferin takes a critical strikingly fresh look at the international image surrounding Finnish architecture today and more importantly what lies behind it why this particular image emerged The Museum of Finnish Architecture was created in part to promote Finnish architecture abroad Employing a series of carefully crafted exhibition tours comprised largely of photographs the museum strove to define and disseminate the best architecture the country had to offer Both the name and work of the renown Alvar Aalto lent credibility and celebrity to these events capturing the imagination of the public and the press alike Čeferin sees this exhibition process as the making of a legend a rich story handed down from the past the truth of which she questions with a rare mix of revealing empirical research and a sharp sense of investigative irony Why do we talk about Finnish architecture the way we do Why does it appear so easy to recognize its central features in the buildings designed by Finnish architects And why it is so difficult to describe them in a way that does not correspond with what we know as Finnish architecture Seizing on the notion that we know architecture principally through photography that architecture was conveyed to the public through the photographs at these exhibitions she points to the curious role of this medium in creating a specific image of Finnish architecture The foundations of modern architecture are in for some critical restoration **Wood, Stone and Steel** Riitta Nikula, 2005 **The New Finnish Architecture** Scott Poole, 1992 The New Finnish Architecture is a rich detailed and long overdue examination of Finland's vital contributions to twentieth century

modern architecture over the last four decades Home to Alvar Aalto one of the greatest masters of the modern movement Finland has nurtured many dedicated and innovative architects who continue to wrestle with the lessons of modernism and the legacy of Aalto This volume presents the work of thirteen individual architects and firms and their engaging and provocative designs Among them are Arkkitehdit KY Juhani Pallasmaa Arto Sipinen Heikkinen Komonen ARRAK and MONARK the student collective that won the national competition for the Finnish pavilion at the 1992 World s Fair in Seville Each architect or firm is presented individually in well illustrated chapters Two essays by author Scott Poole give a historical overview of modern architecture in Finland the work of Aalto and the work of the rationalist school that followed him in the 1950s including Aulis Blomstedt Aarno Ruusuvuori and Juhani Pallasmaa among others The New Finnish Architecture continues Rizzoli s series on current international developments in architecture following The New French Architecture and The New Japanese Architecture Forthcoming volumes will feature Germany Spain Italy Mexico and Austria

Title Summary field provided by Blackwell North America Inc All Rights Reserved *A Guide to Finnish Architecture* Jouni Kaipia,Lauri Putkonen,1997 *A guide to Finnish architecture* Sir James Maude Richards,1966 **Finnish Architecture** Eduard Neuenschwander,Claudia Neuenschwander,1954 **A Critical History of Contemporary Architecture** Dr Elie G Haddad,Asst Prof David Rifkind,Ms Sarah Deyong,2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **One Man's Odyssey in Search of Finnish Architecture** Reima Pietilä,1988 **Architecture and Identity** Peter Herrle,Erik Wegerhoff,2008 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars but in the everyday lives of people around the world There is a common complaint about the loss of identity which to a substantial degree is being associated with the built environment in cities and specifically with their architecture Architecture and Identity takes a global multidisciplinary look on how identities in contemporary architecture are constructed The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in Organic Design in Twentieth-Century Nordic Architecture Erik Champion,2019-02-18 Organic Design in Twentieth Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints The book focuses on the works and writings of architects

in Nordic countries such as Sigurd Lewerentz, Jørn Utzon, Sverre Fehn and the Aaltos, Aino Elissa and Alvar among others. It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another. Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer, architectural brief and building as process. With over 140 black and white images, this book is an intriguing read for architecture students and professionals alike.
