Securing the MRAP James Hasik,2021-08-16 Dwight D Eisenhower once quipped You will not find it difficult to prove that battles campaigns and even wars have been won or lost primarily because of logistics Military acquisition and procurement that is how a nation manages investments technologies programs and support is critical to wartime success or failure When unexpected battlefield problems arise how do the government the military and industry work together to ensure effective solutions During the American counterinsurgent campaign in Iraq the improvised explosive device emerged as a disruptive and devastating threat As Humvees and their occupants were ripped apart by IEDs it was clear that new solutions had to be found These solutions already existed but had not been procured highlighting the need for more effective marketing to the military by industry The ultimate successful response the mine resistant ambush protected vehicle or MRAP required years of entrepreneurial marketing by the defense industry In Securing the MRAP Lessons Learned in Marketing and Military Procurement James Hasik explores how these

vehicles which the American military mostly rejected despite the great need for them eventually came to be adopted as the Pentagon's top procurement priority. Hasik traces the story of the MRAP from the early 1970s to the future of mine resistant vehicles on the battlefields of tomorrow. An important contribution to the seemingly disparate fields of marketing and defense policy. Securing the MRAP is an eye opening revelation to defense industrialists, military officers and government officials who want to understand how to avoid another IED Humvee debacle. *Food Resistance Movements* Ferne

Edwards, 2023-01-04 This book examines food resistance movements as a form of alternative food network charting the author's journey as a cultural anthropologist through three food resistance movements. In Australia, freegans' consumption of garbage in the food waste movement of the early 2000s reveals the extent of food going to waste from commercial sources while people go hungry. In contrast, Venezuela's food sovereignty movement is part of a national transition from a capitalist to socialist economy, highlighting processes of decentralisation, collectivisation and government grassroots coalitions. The study of autonomous spaces in Catalonia illuminates how food sharing can enable people to live their politics as well as the centrality of issues around urban governance, consumption technology and use of space to food resistance efforts. This engaging volume brings an important and engaging contribution to current discussions around the transition to just and sustainable food systems. **Dead Presidents' Guide to Project Management** James Johnson, 2019-02 The Dead

With a foreword by design guru Don Norman, *Humans* makes things every day, whether it's composing an e-mail, cooking a meal or constructing the Mars Rover. While complexity is often necessary in the development process, unnecessary complexity adds complications. *The Simplicity Cycle* provides the secret to striking the proper balance. Dan Ward shines a light on how complexity affects the things we make for good or ill, taking us on a journey through the process of making things with a particular focus on identifying and avoiding complexity related pitfalls. The standard development process involves increasing complexity to improve the outcome. Ward explains, "The problem comes when the complexity starts getting in the way but often we don't know where that point is until we pass it." He suggests a number of techniques for identifying the problem and fixing it, including how to overcome several types of wrongheaded thinking such as the idea that complexity and quality are the same. In clear

compelling language and using his trademark mix of examples from research personal experience and pop culture Ward offers a universal concept visually described with a single evolving diagram Ideal for business leaders and technologists The Simplicity Cycle is helpful for anyone looking to simplify and improve everything we do whether we work in an office at home or at the Pentagon
