[Suffering Body in Sport](#) Kevin Young, 2019-07-24 This volume approaches the study of pain risk and injury in sport from a variety of social scientific perspectives Contributions focus on the manifestations of pain risk and injury within sport cultures and the degree to which the research is rapidly expanding to include new ways of thinking about risky and painful suffering in sport [Waterlogged](#) Timothy Noakes, 2012-05-01 Drink as much as you can even before you feel thirsty That s been the mantra to athletes and coaches for the past three decades and bottled water and sports drinks have flourished into billion dollar industries in the same short time The problem is that an overhydrated athlete is at a performance disadvantage and at risk of exercise associated hyponatremia EAH a potentially fatal condition Dr Tim Noakes takes you inside the science of

athlete hydration for a fascinating look at the human body's need for water and how it uses the liquids it ingests. He also chronicles the shaky research that reported findings contrary to results in nearly all of Noakes' extensive and since confirmed studies. In *Waterlogged*, Noakes sets the record straight exposing the myths surrounding dehydration and presenting up to date hydration guidelines for endurance sport and prolonged training activities. Enough with oversold sports drinks and obsessing over water consumption before, during and after every workout, he says.
