## **Firms Location Selections And Regional Policy In The Global Economy:**

*Firms' Location Selections and Regional Policy in the Global Economy* Toshiharu Ishikawa, 2015-06-03 This book offers a new understanding of how firms determine their location and what kinds of regional economic policies are needed to attract factories to a country and a region in a highly globalized economic setting The theoretical and empirical analyses examine the influence of the transfer pricing system corporate tax rates and a country's industrial structure on a firm's decision to locate and the impact of firms location on regional economic activities The theoretical analysis elucidates the importance of the above mentioned factors in the firm's selection of possible location The empirical analysis uses as an example the case of a supply chain in East Asia The empirical analysis is illustrated with the regional spatial development experiences at the country level and city level of selected countries and cities The analysis offers a perspective for understanding the spatial patterns of a cross border production system

**Industrial Location and Vitalization of Regional Economy** Toshiharu Ishikawa, Daisuke Nakamura, 2023-01-11 This book explains the roles of the industrial location in vitalizing regional economies in various economic environments created due to the progress of globalization Here this book elucidates the impact of industrial location and locational factors on regional economies It clarifies the effects on industrial location of regulations and corporate tax And the book explains the regional economic influence of the employment and agglomeration that are factors influencing the location It also focuses on some countries and examines the relationships between the industrial location and the vitalization of regional economy in each country This analysis covers the automotive and high tech industries in the northeastern region of China the impact of urban systems on regional development in the Philippines and firms in revitalization in the northern region of Sweden And it reveals achievements and challenges in each region Finally the book clarifies that the level of achievement in regional development is related to the educational environment It also suggests that the industrial composition of a region is influenced by the level of regional cooperation with other regions The analyses in the book show that a region must select the industries that match its newly emerged regional characteristics for vitalization

**Locational Analysis of Firms' Activities from a Strategic Perspective** Toshiharu Ishikawa, 2018-08-24 This book presents a variety of research papers on factories locations city systems and regional development Consisting of three parts it provides insights into the locational aspects of firms activities from a strategic perspective Part 1 discusses decision making in the context of location specifying the motivation for firms to move their factories provided by the corporate tax system It also presents a case study from East Asia to clarify a mechanism by which firms move factories Part 2 addresses city systems offering theoretical clues to understanding why city systems are important to regional economies It also clarifies from the empirical analysis the relations between city systems and the performances of regional economies Part 3 investigates the topic of industrial parks demonstrating how they form a basis for establishing industrial clusters in regional economies In addition it examines the economic phases such as economic disparity generated in the process of

development      **Dynamic Locational Phases of Economic Activity in the Globalized World** Toshiharu

Ishikawa, 2016-03-11 This book clarifies the mechanisms of economic globalization in changing industries locations and shows how industries locations have changed through those mechanisms First the book deals with the retailing industry Introducing the concept of a contact price into the market area analysis it is shown in Part I that retailers market areas and prices are changed in different ways by a reduction of transportation costs The mechanism of these changes is explained by checking the contact prices at apexes of the retailers market areas Then the book moves to the manufacturing industry and deals with a firm's production process Part II of the book shows the manner in which the production volume of factories within an agglomeration is decreased as the number of factories within the agglomeration increases Subsequently considering the fact that many production factories depart from agglomerations to other sites to reduce production costs a method of searching for a factory's new site is proposed in which a firm can seek out an optimal location of a factory in a short period of time By referring to a chaotic phenomenon a firm sets a location prospective area in a large geographical area and selects an optimal location within that area In the third part of the book the city system is the focus Part III elucidates the theoretical formation of a city system and analyzes structural changes of a city system due to a reduction of transportation costs The mechanism of the change is explained by a flexible market area theory which studies a city system by using the market areas established in the free entry equilibrium Then the economic relationships between the cities within a city system are examined from the point of view of the land rent in the cities areas This analysis shows the influences of a change in the largest city on other cities Finally the relationships between a city system and regional performance are examined using real data The examination shows that the city system reveals the regional performance      **Role of**

**Industrial Agglomeration in Regional Economic Activity** Toshiharu Ishikawa, 2025-01-21 This book analyzes role of industrial agglomeration in regional economy The analysis shows the functions of the agglomeration in two stages of economic development before and after the globalization This analysis is followed by verification of the effectiveness of the agglomeration analysis by using Japanese economic data First the book clarifies that the agglomeration contributes to reducing the production costs though the land based economies In line with the minimum cost logic it is shown that the market competition modes that minimizes the delivery prices to the consumers comes to prevail in the spatial goods market Secondly the book explains that firms production processes are fragmented by connection economies and the land based economies of the agglomeration The fragmentation increases the differentiation among workers and between the regions And then it increases the opportunity for government to intervene in the industrial locations In this intervention industrial parks that provide agglomeration economies become important as a means of the policy The final part of the book shows that the inspection using the regional economic data in Japan supports the effectiveness of the analysis using the concepts of the connection economies and the land based agglomeration economies Lastly an industrial policy based on the results derived

by the analysis is proposed for the regions in the rural area      *Cities as Spatial and Social Networks* Xinyue Ye,Xingjian Liu,2018-07-24 This book reports on the latest cutting edge scholarship on integrating social network and spatial analyses in the built environment It sheds light on conceptualization and Implementation of such integration integration for intra city level analysis as well as integration for inter city level analysis It explores the use of new data sources concerning human and urban dynamics and provides a discussion of how social network and spatial analyses could be synthesized for a more nuanced understanding of the built environment As such this book will be a valuable resource for scholars focusing on city related networks in a number of urban disciplines including but not limited to urban geography urban informatics urban planning urban sociology and urban studies      **Economic Integration and Spatial Location of Firms and Industries** Miroslav N. Jovanović,2007 Aims to provide a survey of the theoretical foundations of spatial location of firms and industries and to explore the impact of economic integration on this process This book is intended for scholars theorists policymakers and business executives who face these challenges to the economy      **Key to Economic Science and Managerial Sciences** ,1983 Semi monthly review with annual indexes of abstracts on economics finance trade industry foreign aid management marketing labour      Economic Titles/abstracts ,1986      *OECD Territorial Reviews Competitive Cities in the Global Economy* Organisation for Economic Co-operation and Development,2006-12 A synthesis report drawing from OECD metropolitan reviews this book shows large cities performance within their countries and addresses key dilemmas including competitiveness and social cohesion intergovernmental relationships and urban finance      **Journal of Agricultural and Applied Economics** ,2008      **The World Bank Research Observer** ,2008      **Decision** ,1988      **The World Economy** ,1998 Covers trade policy and other open economy issues embracing international trade and the environment international finance and trade and development It also considers related areas such as economies in transition and development economics      **Journal of Economic Literature** ,1986      **Locational Dynamics of Manufacturing Activity** Lyndhurst Collins,David F. Walker,1975      *Key to Economic Science* ,1977      *Entrepreneurship and Innovations in Functional Regions* Charlie Karlsson,Börje Johansson,Roger Stough,2009 The contributions forming the different chapters in this book were first presented and discussed at the Eight Uddevalla Symposium 2005 held at and hosted by the University West Uddevalla Sweden Pref      Selection of Studies Published in the First Half of 2007 ,2007      *Economic Titles* ,1977
