Generations At Risk Generations At Risk:

Generations at Risk, 1999 **How to Pool Risks Across Generations** Michael Otsuka, 2023

How to Pool Risks across Generations makes the case for the collective provision of pensions on fair terms of social cooperation. Through the insurance of a mutual association which extends across society and over multiple generations we share one another's fates by pooling risks across both space and time. Resources are transferred not simply between different people but also within the possible future lives of each person from one's more fortunate to one's less fortunate future selves. The book opens with an investigation of the longevity and investment risk that even a single individual on a desert island would face in providing for her old age. From this atomistic starting point it builds up within and across the chapters to increasingly collective forms of pension provision. By joining together it is possible to tame the risks we would face as individuals each with our own private pension pot. A collective pension can be justified as a social union of social unions, an enduring corporate body which is formed by agreements to pool risks in a manner that involves reciprocity between the various individuals that constitute the collective. Even though all individuals age and die, a collective pension scheme remains evergreen as the average age of members remains relatively unchanged through the influx of new members to replace those who retire. It is therefore possible to smooth risks indefinitely across as well as within generations to the mutual advantage of each.

Drugs, Crime, and Their Relationships Glenn D. Walters, 2014

An Essential Text. Unlike Any Other in the Field. Surveys administered to high school students, studies carried out on jail and prison inmates, and interviews conducted with substance abusers undergoing treatment all point to the same conclusion: drugs and crime are strongly connected. Why they are connected is less well understood, however. Written for middle to upper level undergraduate courses on drugs and crime or substance abuse and crime, this book examines the drug-crime connection in a systematic and comprehensive way. *Drugs, Crime, and Their Relationships* covers the entire drug-crime spectrum, starting with a review of drug and crime terminology, classification, and theory, and ending with policy implications for prevention, harm reduction, and macro-level management of the drug-crime problem. The opening chapters discuss drugs and crime separately for the purpose of setting the stage for later discussions on drug-crime relationships. As the book proceeds, the boundaries between drugs and crime blur, thus revealing the complex and intimate relationship that links these two behaviors. *Drugs, Crime, and Their Relationships* is divided into four sections. The first section offers an introduction and overview of theories on drugs, crime, and their relationships. The second section explores the relevant research on the biological, psychological, sociological, and static situational correlates of drug-crime relationships. The third section considers the practical implications of drug-crime connections for the criminal justice system, offender assessment, and treatment programming. The fourth and final section examines the policy implications of the drug-crime relationship in the form of prevention, harm reduction, and society's response to drugs and drug-related crime. Students will enjoy the engaging writing style; instructors will welcome the logical manner in which the text is organized, and scholars

will appreciate the comprehensiveness of coverage and the range of citations Provides a step by step breakdown and synthesis of the drug crime connection Organized logically so that a student first progresses through chapters that treat drugs and crime separately gradually replaced by overlapping discussion of drugs and crime up until the final section policy where the overlap is nearly complete Covers core topics including the history of drugs and crime in America theories of substance abuse DSM IV criteria for substance abuse antisocial personality disorder theories of crime and neurotransmitters and drugs Also includes discussions on important topics not commonly found in other texts including meta analysis genetics of drug use and crime drug diversion programs prison based treatment programs for drug offenders evidence based intervention harm reduction Portuguese and Dutch experiments and much more Pedagogical features Chapter opening learning objectives and chapter ending summary and critical thinking questions List of key words in each chapter News Spots that highlight a related topic from the news to demonstrate the relevance of the chapter material to one's everyday life and situations Questions to Ponder following each News Spot intended to stimulate critical thinking and classroom discussion Every new printed copy is packaged with full student access to the companion website featuring a wealth of engaging and interactive study tools Instructor resources include PowerPoint Lecture Outlines and a Test Bank Drugs Crime and Their Relationships Theory Research Practice and Policy is written for middle to upper level undergraduate students enrolled in courses on drugs and crime or substance abuse and crime Courses can be found in numerous departments including Criminal Justice Criminology Social Work Political Science Psychology and Sociology 2014 488 pages **Grid-Connected**
