Genethik Probleme Der Technisierung Menschlicher Fortpflanzung:

Ethics & Biotechnology Anthony Dyson, John Harris, 2002-09-11 The development of biotechnology has produced nothing short of a revolution both in our capacity to manipulate living things from single plant cells to human nature itself but also to manufacture brand new life forms This power to shape and create forms of life has sometimes been described as the power to play God and this book is about the ethics of playing God in the field of biotechnology International scholars cover moral dilemmas posed by biotechnology from the smallest cells through animals to the engineering of human beings *The Self-destruction of the West* Damien François, 2007 Voilà d'ordinaire plus de 10 000 ans que la civilisation occidentale s'est installée et voilà 10 000 ans qu'elle viole le sens même de la nature la vie En s'appropriant sans concession ce qui l'entourait l'homme de l'Ouest a vu son horizon ployer sous la charge de la destruction qu'il lui avait lui-même réalisée Sommes-nous des lycanthropes ou des vampires Ces monstres si terrifiants qui sortent de notre imagination sont-ils en réalité la copie de notre comportement d'ivrogne ? Prudents nous sommes sans remords les énergies qui nous entourent Jusqu'où ira-t-on

Advances in Mutagenesis Research 2 Günter Obe, 2012-12-06 The new field of applied genetic research genetic toxicology and mutation research investigates the mutagenicity and cancerogenicity of chemicals and other agents Permanent changes in genes and chromosomes or genome mutations can be induced by a plethora of agents including ionizing and nonionizing radiations chemicals and viruses Mutagenesis research has two aims 1 to understand the molecular mechanisms leading to mutations and 2 to prevent a thoughtless introduction of mutagenic agents into our environment Both aspects namely basic and applied will be treated in the new series *Advances in Mutagenesis Research* *Naturalness* Dieter Birnbacher, 2014-04-15 In *Naturalness* Dieter Birnbacher delves into an argument common in everyday thinking and ethics the argument of naturalness This argument suggests that what is natural is in some ways superior to what is artificial due to repeated positive connotations associated with the natural This book presents both a phenomenology and a critique For the former *Naturalness* reviews the role of naturalistic arguments in various domains of everyday language and reasoning as well as in political and ethical debates especially regarding controversial issues in preservation For the latter it critically discusses the persuasiveness of naturalness both intellectually and morally and how it is currently no more than an expression of conservatism and resistance to change in basic orientations *Issues in Reproductive and Genetic Engineering*, 1992 Pragmatic Tendencies in Scientific Theory Herbert Stachowiak, 1995 **Dialectics and Humanism**, 1990 The Polish philosophical quarterly **Ethical Dimensions of Technology Transfer in Biomedicine** Kurt Bayertz, Hilmar Stolte, Ursula Zimmermann, 1993 One of the most innovative areas of science and technology is biomedicine Progress within this field has led to a range of new options which not only open up new methods for a diagnosis and therapy of diseases but also entail considerable risks The contributions within this book analyse and discuss the problems involved from varying points of view They shed light upon a multitude of new biomedical technologies and discuss ways of dealing

Herbert Schlotter,1993 *Human Dignity and Animal Well-being* Mats G. Hansson,1991 New developments in the area of biomedicine give rise to difficult ethical questions and sometimes also to intense discussions Reference is often made to the notion of human dignity but it is seldom clear how this notion is to be understood What does the notion imply with regard to unborn human beings Does the notion of a distinctive human dignity allow us to ignore the interests of animals In this study ethical problems related to prenatal diagnosis embryo research transplantation of foetal tissue certain methods of assisted reproduction and genetic intervention in human and animal life are analyzed treat humanity merely as a means but always also as an end From this and other principles Kant derived the duties of respect and beneficence These principles and duties are necessary but not sufficient in order to arrive at conclusions in ethics We need additional moral competence in order to assess the morally relevant facts In this study Kant's distinction between determinant and reflective judgement is used in order to give a complete exposition of his ethical system theories available to us in discussing ethical problems related to biomedical research and clinical practice The conclusion of the study is that the Kantian account provides a fruitful ethical approach which gives differentiated answers to the different questions posed **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1989 *Die menschliche Natur* Kurt Bayertz,2005 Das Thema menschliche Natur hat eine lange Tradition in der Geschichte des philosophischen Denkens Vor allem in Krisenzeiten und an Epochenschwellen stellte sich immer wieder Frage was der Mensch eigentlich ist Es sollte daher auch nicht berraschen da diese Frage auch in der Gegenwart wieder eine zunehmende Aufmerksamkeit findet Nach langen Jahren eines nur zur ckhaltenden Interesses findet die philosophische Anthropologie wieder st rkere Aufmerksamkeit Und doch handelt es dabei nicht nur um die Wiederaufnahme eines alten Themas Die philosophische Besch ftigung mit der menschlichen Natur hat im Zusammenhang mit den Fortschritten der modernen Bio und Informationstechnologie eine unmittelbar praktische Relevanz bekommen die sie in dieser Weise niemals zuvor hatte Durch diese Fortschritte haben n mlich die M glichkeiten technischer Eingriffe am Menschen eine Dimension erreicht die nicht mehr nur einzelne seiner Merkmale manipulierbar macht sondern seine Natur selbst Dies gilt insbesondere im Hinblick auf die nicht mehr vollkommen utopische Idee eines genetischen Umbaus der gesamten Menschheit Die Frage die sich vor diesem Hintergrund stellt ist die nach dem normativen Status der menschlichen Natur Ist die psycho physische Gestalt in der wir den Menschen seit jeder kennen ein Produkt zuf lliger evolution rer Prozesse und als solche moralisch neutral oder ist sie intrinsisch wertvoll und daher sch tzenswert Die in der Literatur ge u erten Meinungen zu dieser Frage gehen auseinander Auf der einen Seite stehen diejenigen die in der menschlichen Natur lediglich eine Tatsache sehen und keinen Grund erkennen k nnen weshalb diese Tatsache sakrosankt ein sollte Unter bestimmten Voraussetzungen so behaupten die Vertreter dieser Partei kann es nicht nur legitim sein die

menschliche Natur zu verbessern es kann sogar moralisch geboten sein Auf der anderen Seite st t genau diese Vorstellung einer technischen Rekonstruktion des Menschen auf Emp rung und Abscheu Abgesehen von allen Risiken die mit einem solchen Herumbasteln verbunden sind werde der Mensch auf diese Weise auf ein beliebiges St ck Natur reduziert er werde zum totalen Objekt technischen Handelns und seiner W rde beraubt Der menschlichen Natur m sse daher ein inh renter Wert zugeschrieben werden um den unverantwortlichen Pl nen der Menschheitsverbesserer eine kategorische Grenze zu setzen Doch was ist die menschliche Natur Worin besteht sie und wie kann sie angesichts der un bersehbaren individuellen und kulturellen Vielfalt definiert werden Dies ist die erste Frage der die Beitr ge des vorliegenden Bandes gewidmet sind Und an sie schlie t sich sogleich eine zweite an Wenn es denn eine menschliche Natur gibt und wenn diese hinl nglich genau umrissen werden kann Kann oder mu ihr dann ein moralischer Status zugeschrieben werden Und welcher Art ist dieser Status Ist er der menschlichen Natur inh rent oder leitet er sich von etwas anderem ab **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 elsi bibliography us department of energy office of energy research,1993 **Philosophisches Jahrbuch** Constantin Gutberlet,1988 Schriftenreihe ,1952
