Geographic Information Systems Spatial Modelling And Policy Evaluation:

Geographic Information Systems, Spatial Modelling and Policy Evaluation Manfred M. Fischer, Peter Nijkamp, 2012-12-06
Geographical Information Systems GIS provide an enhanced environment for spatial data processing The ability of geographic information systems to handle and analyse spatially referenced data may be seen as a major characteristic which distinguishes GIS from information systems developed to serve the needs of business data processing as well as from CAD systems or other systems whose primary objective is map production This book which contains contributions from a wide ranging group of international scholars demonstrates the progress which has been achieved so far at the interface of GIS technology and spatial analysis and planning The various contributions bring together theoretical and conceptual technical and applied issues Topics covered include the design and use of GIS and spatial models AI tools for spatial modelling in GIS spatial statistical analysis and GIS GIS and dynamic modelling GIS in urban planning and policy making information systems for policy evaluation and spatial decision support systems

Expert Systems and Geographic Information Systems for Impact Assessment Agustin Rodriguez-Bachiller, John Glasston, 2004-08-12 Impact Assessment is becoming part and parcel of an increasing number of development proposals in the UK and Europe As the practice of Impact Assessment develops it becomes more standardized and good practice starts to be defined However the quality of Impact Assessment is still far from satisfactory Expert Systems and GIS for Impact Assessment

Geographical Information Systems and Computer Cartography Chris B. Jones, 2014-05-01 A concise text presenting the fundamental concepts in Geographical Information Systems GIS emphasising an understanding of techniques in management analysis and graphic display of spatial information Divided into five parts the first part reviews the development and application of GIS followed by a summary of the characteristics and representation of geographical information It concludes with an overview of the functions provided by typical GIS systems Part Two introduces co ordinate systems and map projections describes methods for digitising map data and gives an overview of remote sensing Part Three deals with data storage and database management as well as specialised techniques for accessing spatial data Spatial modelling and analytical techniques for decision making form the subject of Part Four while the final part is concerned with graphical representation emphasising issues of graphics technology cartographic design and map generalisation
