Geographies of Development, 2004

Geographies of Development in Latin America Anthony Bebbington, 2005-11-01 The last major intervention on Development in Latin America was arguably Arturo Escobar's Encountering Development Nearly a decade on his scathing indictment still casts its shadow of critical development studies Geographies of Latin American Development elaborates a framework for

understanding development processes in Latin America that focuses on the geographically differentiated interactions between political economy organized intervention and livelihoods It argues that intervention and livelihood do not simply derive from political economy The first section elaborates this analytical framework and the overall argument of the book The second section uses this framework to explore a series of cases drawn from Ecuador Chile Peru Bolivia Brazil Columbia and Mexico thus helping to ground discussion in specific historical and geographical contexts Each case focuses on particular themes and above all the interventions of particular types of actors Bebbington draws on concepts within geography to both respond to and build on Escobar s interpretation in a way that retains many of his critical insights while recovering some of the emancipatory connotations of development the diversity of its trajectories and possibilities and thus contributing more directly to development alternatives

Making Development Geography Victoria Lawson,2014-03-18 Making Development Geography is a timely new book which introduces readers to the major themes and debates in development geography It argues cogently that the field is engaged in an ongoing process of reinventing itself as critical development geography and highlights issues such as identity globalization social movements and sexuality Readers are guided through the key concepts and developments of the last 50 years surveying the themes of Keynesianism Marxism and post colonialism At the same time each chapter uses international examples to discuss important contemporary issues so that the real world applications of theory can be understood This enlightening book offers a comprehensive introduction to the fundamental debates for anyone with an interest in development issues

Rethinking Development Geographies Marcus Power,2003 Development as a concept is notoriously imprecise vague and presumptuous Struggles over the meaning of this fiercely contested term have had profound implications on the

destinies of people and places across the globe Rethinking Development Geographies offers a stimulating and critical introduction to the study of geography and development In doing so it sets out to explore the spatiality of development thinking and practices The book highlights the geopolitical nature of development and its origins in Empire and the Cold War It also reflects critically on the historical engagement of geographers with the Tropics the Third World and the South The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed The interconnections between globalization and development are highlighted through an examination of local national and transnational resistance to various forms of development The text provides an accessible introduction to the complex and confusing world of contemporary global development Informative diagrams cartoons and case studies are used throughout While exploring global geographies of economic and political change Rethinking Development Geographies is also grounded in a concern with people and places the view from below the views of women and the view from the South **Doing**
