Geography Grade 12 Caps:

Geography, Grade 12 Helen Collett, Peter J. Holmes, Norma Catherine Winearls, 2013-07-03 Study Master Geography Grade 10 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement CAPS. This new and easy to use course helps learners to master essential content and skills in Geography. The innovative Teacher's File includes guidance on teaching each lesson of the year and on assessment answers to all activities in the Learner's Book, photocopiable tests and examinations, extra assessment tasks, photocopiable consolidation, extension and revision activities. Geography Susan Rushton, 2019 Ecotheology Levente Hufnagel, 2023-01-11 Ecotheology Sustainability and Religions of the World gives a very interesting overview of the frontiers of scientific research in this important multi and transdisciplinary area. Its chapters use ecotheological approaches to discuss the multiple aspects of an environmental crisis from almost every segment of our planet. This book will be very useful for everyone: researchers, teachers, students or others interested in the field who would like to gain some insights into this aspect of our culture. Education and climate change Samantha Govender, Mncedisi C. Maphalala, Dumisani W. Mncube, 2025-06-15 The book highlights the critical yet often overlooked role of education in combating climate change. It advocates for a transformative educational framework that integrates social emotional learning and interdisciplinary collaboration. Traditional education which focuses solely on factual knowledge is deemed insufficient. Instead, education should foster empathy, provide hands-on experiences and encourage active engagement in climate solutions. The book outlines various ways education can drive climate action, such as raising awareness, preparing individuals for green jobs, empowering communities and fostering innovation in higher education. It highlights the interconnectedness of climate change and education, particularly for marginalised populations, showing how quality education can enhance both mitigation and adaptation strategies while supporting Sustainable Development Goal SDG 4 and SDG 13. Key chapters discuss successful initiatives such as the Keep it Cool Climate Change Education KIC CCE project in South Africa and offer strategies for integrating climate change education into subjects like Natural Sciences and Geography. Ultimately, the book positions education as a strategic tool for promoting sustainable development and building climate resilience. New research findings presented in the book connect education to climate change, highlighting education as both a tool to address climate issues and a domain affected by these issues. The book integrates empirical evidence, innovative theories and practical examples to ensure intellectual integrity and academic rigour. It introduces a unique framework that emphasises social emotional learning, action-oriented teaching and interdisciplinary collaboration. Case studies such as the KIC CCE initiative in South Africa illustrate these concepts. The book critiques traditional models and advocates for transformative approaches to climate education, aligning with SDG 4 Quality Education and SDG 13 Climate Action. It also highlights the significance of teacher preparedness, community empowerment, gender equality and innovation, providing valuable insights for scholars, policymakers and practitioners addressing the climate crisis.

Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27

In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
