Predisposition to Disease Charles R. Cantor, 1990-04-27 This work describes the remarkable developments in the detection of inherited or acquired genetic mutations Focusing on the advances in DNA technology the book examines new methods for large scale genome mapping DNA sequencing and protein structure analysis The progress of molecular diagnostics in revealing significant human disease genes and in understanding DNA damage and repair is also discussed in the state of the art work Significant discussions underscore the pervasive and powerful influence of the polymerase chain reaction in all areas of DNA manipulation and analysis A Primer of Molecular Biology Robert Roberts, 1992-07-31 In a recent plenary address to the American College of Cardiology Dr Leroy Hood stated that he expected the application of the techniques of recombinant DNA and molecular biology to medicine would advance the field more in the next twenty years than all of the progress that has been made in the past 2 000 years Cardiology as a discipline has been one of the last to embrace the techniques of molecular biology yet the advances made in the past five years have indeed been dramatic Thrombolytic therapy introduced with a bang through the use of recombinant tissue plasminogen activator rt PA is now part of the routine armamentarium in the treatment of patients with acute myocardial infarction Tissue plasminogen activator was the first drug made with the use of recombinant DNA techniques to be used in cardiology and was approved by the Food and Drug Administration FDA in 1989 In the short time since then five other drugs made by these techniques have been added to the treatment of patients with ischemic heart disease hirudin superoxide dismutase urokinase prourokinase and multiple mutant forms of rt PA The FDA has approved fewer than 100 drugs that are made by recombinant DNA techniques but estimates that by the year 2000 over 50% of all drugs will be made by these techniques **Analysis of Dystrophin Structure and Function in Transgenic Mdx Mice** Gregory Allen Cox, 1994
