Embracing Diversity in Psychological Assessment and Research Melissa Ng Lee Yen Abdullah, Lim Hooi Lian, Yeo Kee Jiar, 2024-06-07 Diverse learners bring a broad range of experiences and perspectives into the classroom and offer a powerful resource for learning. However, they also pose major challenges to practitioners and researchers working in the field of education. Biases and inequitable social consequences may occur when assessing young children, students with disabilities, high ability students, and culturally and linguistically diverse learners. Through a compilation of empirical studies, this book aims to present both theory and applications of assessment in educational research. Each chapter focuses on different groups of learners, which include Malaysian students, Japanese pre-schoolers, gifted Saudi students, Nigerian adolescents, and foreign language learners in Gaza. Based on the assessment procedures and outcomes obtained in each study, good practices of assessment are provided at the end of the book.

Digital Literacy for Primary Teachers Moira Savage, 2025-02-28 The educational landscape for primary teachers and learners is increasingly digital and technology-rich, making it a challenge for professionals to decide which digital technologies to use, how, and when to bring about the maximum benefit for learning and teaching. This book navigates this complex and evolving arena, providing a structure for teachers to reflect on their own digital literacy, helping them make informed decisions, providing practical ideas on how to develop children's digital literacy capabilities, and offering a range of professional development activities. The text makes clear links to the new primary curriculum, including the computing programmes of study. It is pedagogy-led and illustrated with a range of subject examples. Chapters examine the implications of digital literacy for teaching and learning, creating content, collaboration, and communication, digital citizenship, safety, and digital safeguarding. Critical questions and reflections throughout stimulate readers to engage fully with the text and their professional development.

The Metamorphosis of Cultural and Creative Organizations Federica De Molli, Marilena Vecco, 2021-11-03 Organizations in the creative and cultural sector are experiencing transformational change. This book offers a new way of exploring the transformational processes that these organizations are going through by focusing on their organizational space. By bringing together theoretical and empirical contributions from international scholars belonging to different fields of research, such as management, entrepreneurship, sociology, philosophy, and anthropology, this volume seeks to provide readers with a multifaceted, comprehensive understanding of the changes that creative and cultural organizations are facing. By exploring them from an original perspective, the spatial one, this volume provides the foundations for developing a coherent research debate on the spatial dimension of creative and cultural organizations, leading to a new research agenda. This book contributes to our understanding of the space of the creative and cultural industries and will be a useful reading for scholars involved in arts and cultural management, in particular, as well as the social and human sciences more broadly. This book will inspire and inform researchers and managers who look with curiosity at the changes taking place in the creative and cultural sectors.
