*Marine Ecosystem Assessment for the Southern Ocean: Meeting the Challenge for Conserving Earth Ecosystems in the Long Term* Monica M. C. Muelbert, 2024-12-24 National and international agencies need assessments of change in ecosystems and their drivers in order to sustain natural systems to maintain the delivery of services and to meet the challenge for conserving Earth ecosystems in the long term In marine systems change may arise directly from human activities e g fisheries indirectly from local or global activities cascading effects through food webs from fisheries or changing environments from climate change and or ocean acidification or from naturally varying processes A particular challenge for managers is to identify how dangerous future climate change will be for ecosystems and their services and whether mitigation or adaptation may be needed in advance in order to achieve the conservation requirements For regions of international attention particularly those that have the attention of many management or policy oriented bodies a standardized process is needed to harmonize the scientific information on the status and trends in ecosystems used by the different bodies That process also needs to ensure the information is available in a timely manner For example assessments of change in habitats species and or food webs in the Southern Ocean are currently compiled separately for at least ten different international organizations or processes A Marine Ecosystem Assessment for the Southern Ocean MEASO aims to harmonize that information for policy makers This assessment began with an international conference in April 2018 <http://www.measo2018.aq> where it was agreed to undertake the first MEASO over 2018 2019 with the view to provide the outcomes to relevant bodies such as the Scientific Committee for the Conservation of Antarctic Marine Living Resources soon after

**The Rise of the Commercial Space Industry** Brian C. Odom, 2024-09-13 This collection explores the evolution of the commercial space industry from the beginning of the space age through the early twenty first century Today the space industry is taking on an increased leadership and innovation role in both space access and exploration The growth of commercial space over the past decades offers a potential new paradigm for space exploration one in which industry transitions from supplier to partner However many questions remain This book seeks to bring to light these questions which span from the most seemingly consequential how will humanity explore the Moon and Mars to the most basic what is commercial space To further develop the historical context of commercial space and thereby better inform decision making at NASA in the future this volume examines a broad range of questions related to the history of commercial space operations including but not limited to how has the concept of commercial space evolved in different fields and disciplines What have been the major events and milestones in the emergence and evolution of commercial space activities in the USA and internationally How has the US Government assisted or impeded the emergence and evolution of commercial space activities Providing contributions from a range of different disciplines and backgrounds the authors of this volume offer valuable insights for scholars researching the history of space and space policy as well as decision makers working at NASA or within

the wider space industry      *Fracking and the Environment* Daniel J. Soeder, 2020-11-11 This book provides a systematic scientific approach to the understanding of hydraulic fracturing fracking as a hydrocarbon extraction technology and its impact on the environment The book addresses research from the past decade to assess how fracking can affect air water landscapes and ecosystems and presents the subject in the context of the history of fracking and shale gas development in the United States describing what is known and not known about environmental impacts and the broader implications of fossil energy use climate change and technology development In 9 chapters the author lays out how and why hydraulic fracturing was developed what driving forces existed at the beginning of the so called shale revolution how success was achieved and when and why public acceptance of the technology changed The intended audience is scientific people who are concerned about fracking but perhaps do not know all that much about it It is also intended for lay people who would be interested in understanding the technical details of the process and what effects it might or might not be having on the environment The book is written at a level that is both understandable and technically correct A further goal is to give some useful insights even to experienced petroleum geologists and engineers who have been doing fracking for many years
