True Storytelling Jens Larsen, David M. Boje, Lena Bruun, 2020-09-23 True Storytelling is a new method of studying planning facilitating ensuring implementing and evaluating ethical and sustainable changes in companies organizations and societies True Storytelling is both a method with seven principles and a mindset to help managers and researchers to work with change True Storytelling stresses that we need to balance the resources of the Earth our wellbeing and the economy when we are dealing with change It is not only a book about how to prevent climate change it is also a book about how we can navigate through crisis create less stress and achieve better life in organizations and in society as a whole You will learn how to create innovative start ups with a purpose and fund money for sustainable projects and good ideas The book combines practical cases interviews with managers and CEOs theory and philosophy to define the method and to teach the Seven True Storytelling Principles 1 You yourself must be true and prepare the energy and effort for a sustainable future 2 True storytelling makes spaces that respect the stories already there 3 You must create stories with a clear plot creating direction and helping people prioritize 4 You must have timing 5 You must be able to help stories on their way and be open to experiment 6 You must consider staging including scenography and artefacts 7 You must reflect on the stories and how they create value This book is a guide to implementing these core principles to boost leadership practices create a storytelling culture and staff buy in The method is also useful as an analytical tool for organizations managers and consultants in order to prepare plan and execute the implementation of strategies It is valuable reading for researchers and students at master level as well as leaders and consultants in charge of ethical and sustainable changes

Heidegger and the Environment Casey Rentmeester, 2015-12-04 In the past few decades it has become clear that the Western world's relation to nature has led to environmental degradation so wide ranging that it threatens the existence of human civilizations as we have come to know them The onset of anthropogenic climate change and the increasing threats of resource depletions are the most obvious signs of an environmental crisis This book attempts to examine the metaphysical underpinnings of our current environmental crisis thereby viewing it from a philosophical perspective Using Martin Heidegger's writings on the history of being as its lynchpin it examines how humans have come to view nature as a giant array of mere resources to be maximally exploited Following Heidegger Casey Rentmeester argues that this understanding of nature is rooted in the understanding of what it means to be that came about in ancient Greece Rentmeester then utilizes elements of Heidegger's post metaphysical later philosophy and aspects of early philosophical Daoism to create an alternative way to think about the relation between humans and nature that is environmentally sustainable

The Politics of Ecosocialism Kajsa Borgnäs, Teppo Eskelinen, Johanna Perkiö, Rikard Warlenius, 2015-07-24 As the global economy seeks to recover from the financial crisis and warnings about the consequences of climate change abound it is clear that we need a fundamentally new approach to tackle these issues This innovative book offers a unique perspective stressing the necessity of both ecological and social change as it discusses how to create a red

green or eco socialist society Examining the current crises of welfare capitalism as well as the challenges and conflicts of an eco socialist society the book proposes a new social order that would combine the ideals of egalitarianism and of environmental sustainability It analyses the key social and ecological issues related to the welfare state including green Keynesianism ecological Marxism the limits of growth and no growth capitalist barriers to a renewable energy transition proposals for a universal basic income and the role of technology Finally the book outlines possible paths of transformation towards creating an eco socialist society drawing out lessons that can be applied internationally This book will be of great interest to students and researchers in economics environmental studies and political science Environmental Philosophy, Politics, and Policy John A. Duerk, 2021-03-17 As an issue the environment is complicated First it is layered Secondly it is multifaceted As a result political scientist John A Duerk has assembled an interdisciplinary anthology composed of accessible studies to generate conversations that will yield greater understanding of the many environmental challenges that we face The layers explored herein are philosophy politics and policy Philosophy concerns the ideas that inform our values Politics involves the conflicts that emerge amid the conditions we must navigate Lastly policy encompasses how public and private actors respond to everything from regulation of greenhouse gas emissions to changes in consumer attitudes Regarding the different facets this work is intended to be an entry point for anyone who would like to learn more about issues such as the land ethic the environmental impact of clothing production climate change the placement of bike lanes in cities water usage and artist depictions of the wilderness Let the conversations begin Engaging with Environmental Education through the Language Arts Nicholas McGuinn, Amanda Naylor, 2024-11-04 This creative volume demonstrates the urgent importance of engaging students cognitively and affectively with the climate crisis and environmental education underpinning the vital role the language arts play in expanding this engagement for a better future Moving beyond the basic modalities of English chapters written by an internationally diverse group of contributors advocate for the integration of language arts with environmental education through broad representation of creative subdisciplines drama visual literacy philosophy poetry student voice and more These subdisciplines are explored to suggest the context in which environmental degradation forest ecologies carbon literacy and indigenous knowledges are taught further helping students to develop a comprehensive view of how they can effect change Ultimately the book makes a compelling argument by emphasising the significance of interdisciplinary learning in fostering a holistic understanding of environmental issues This volume will appeal to scholars researchers and postgraduate students in the field of environmental and sustainability education English and literacy language arts and teacher education more broadly Undergraduate students policymakers environmental educators and curriculum designers may also benefit from this volume **Environmental Communication and the Wild** Phillip D. Duncan, Derek Moscato, 2025-07-10 This book explores the representation exploitation and commodification of primitive and wild natural areas in contemporary media and technology Heidegger and the Earth Ladelle McWhorter, Gail

Stenstad,2009-01-01 In this newly revised and greatly expanded edition of Heidegger and the Earth the contributors approach contemporary ecological issues through the medium of Heidegger s thought An Alternative Approach to Family Business Ericson, Mona,2021-10-12 This insightful and innovative book proposes a new theory of socio material weaving for studying and understanding family business It dissolves the family business into activities constituted of the sociality of human interactions and relations and interwoven with materials that extend in both a bodily lived and spatial existential sense **Happiness and Domestic Life** Maria Teresa Russo,Antonio Argandoña,Richard Peatfield,2022-08-19 This book uses a multidisciplinary approach to examine the relationship between the quality of domestic life and the home environment in its material and relational dimension with individual and social happiness in the context of current changes The theme of happiness and well being is framed within two significant changes themselves affected by the recent COVID 19 pandemic the relationship between the individual s quality of life and engagement within the community and the role of new technologies in everyday life The authors highlight the relational nature of happiness and the centrality of the home environment in its promotion Three dimensions of psychosocial well being in the home are analysed the personal one consisting of a sense of stability intimacy and sharing the social one which considers the domestic environment as a place for civic education and in times of pandemic the site of professional activity and the physical one consisting of spaces services and architectural styles This book is ideal for readers who wish to cross disciplinary boundaries and explore the topic of domestic happiness in its different facets The target audience is both professional researchers and advanced graduate and undergraduate students Chapter 12 of this book is now OA on www.taylorfrancis.com under Creative Commons licens CC BY NC ND 4 0

Heidegger's Ecological Turn Frank Schalow,2021-09-05 This book makes explicit the ecological implications of Martin Heidegger It examines how the trajectory of Heidegger s thinking harbors an ecological turn which comes to the forefront in his attempt to anticipate the impending crisis precipitated by modern technology Schalow s emphasis on such key motifs as stewardship dwelling and letting be Gelassenheit serves to coalesce the problem of freedom in a new and innovative way in order to expand the interpretive or hermeneutic horizon for re examining Heidegger s philosophy By prioritizing a response to today s environmental crisis and the possible impact upon future generations the author traverses a divide within Heidegger scholarship by developing a deeper critical outlook on his philosophy without either reiterating standard interpretations or rejecting them wholesale He develops a trans human approach to ethics which by prioritizing the welfare of the earth nature and animals counters the anthropocentric bias and destructive premise of modern technology Heidegger s Ecological Turn will be of interest to Heidegger scholars and researchers working in phenomenology hermeneutics continental philosophy and environmental philosophy **Inhabiting the Earth** Bruce V. Foltz,1995 This work undertakes an analysis of how Heidegger s thought can contribute to environmental ethics and to the more broadly conceived field of environmental philosophy It looks at the status of nature and related concepts such as earth in his thought *Heidegger,*

Politics and Climate Change Ruth Irwin, 2008-12-23 Offers a comprehensive survey of Heidegger's ideas on technology and modernity **Alternative Press Index** ,1997 **Stanford Bulletin** ,2003 **Heidegger's Concept of Philosophical Method** Vincent Blok, 2019-10-08 This book provides new interpretations of Heidegger's philosophical method in light of 20th century postmodernism and 21st century speculative realism In doing so it raises important questions about philosophical method in the age of global warming and climate change Vincent Blok addresses topics that have yet to be extensively discussed in Heidegger scholarship including Heidegger's method of questioning the religious character of Heidegger's philosophical method and Heidegger's conceptualization of philosophical method as explorative confrontation He is also critical of Heidegger's conceptuality and develops a post Heideggerian concept of philosophical method which provides a new perspective on the role of willing poetry and earth interest in contemporary philosophy This earth interest turns out to be particularly important to consider and leads to critical reflections on Heidegger's concept of Earth the necessity of Earth interest in contemporary philosophy and a post Heideggerian concept of the Earth Heidegger's Concept of Philosophical Method will be of interest primarily to Heidegger scholars and graduate students but its discussion of philosophical method and environmental philosophy will also appeal to scholars in other disciplines and areas of philosophy

The Blackwell Encyclopedia of Sociology: ST-Z George Ritzer, 2007 **Book Review Index** Gale Group, Thomson Gale Staff, 1999-09 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year **Naturalizing Heidegger** David E. Storey, 2015-02-10 Explores the evolution of Heidegger's thinking about nature and its relevance for environmental ethics In *Naturalizing Heidegger* David E Storey proposes a new interpretation of Heidegger's importance for environmental philosophy finding in the development of his thought from the early 1920s to his later work in the 1940s the groundwork for a naturalistic ontology of life Primarily drawing on Heidegger's engagement with Nietzsche but also on his readings of Aristotle and the biologist Jakob von Uexküll Storey focuses on his critique of the nihilism at the heart of modernity and his conception of the intentionality of organisms and their relation to their environments From these ideas a vision of nature emerges that recognizes the intrinsic value of all living things and their kinship with one another and which anticipates later approaches in the philosophy of nature such as Hans Jonas's phenomenology of life and Evan Thompson's contemporary attempt to naturalize phenomenology **Heidegger and the Earth** Ladelle McWhorther, 1992 **Heidegger in the Face of the Environmental Question** Enrique Leff, 2023-12-22 This volume engages with the work of Heidegger to argue that the modern environmental crisis is fundamentally a crisis of understanding Life resulting from the symbolic codification of the world from the Logos of Greek philosophy to the rationality of the modern world and resulting in a metaphysics that privileges ontological thinking on the question of being over the environmental question and the concern for the conditions of

life Exploring the work of the three principal thinkers of the Lebensphilosophie Bergson Dilthey and Husserl it charts the itinerary of Heidegger's work and exposes its conflicts with the work of Marx Plessner Heidegger and Derrida A critical argument against the colonization of the world by Eurocentric reason and for the deconstruction of Capital Heidegger in the Face of the Environmental Question draws on Latin American environmental thought to re think the conditions for life on Earth It will therefore appeal to scholars of philosophy political theory and political sociology with interests in environmental philosophy political ecology and socioeconomic transformation
