**Diversity Management and Discrimination** John Wrench, 2016-05-23 What can diversity management offer those concerned with ethnic inequality racial discrimination and issues of social and economic inclusion and exclusion In this book John Wrench traces the emergence of diversity management in the US in the late 1980s and explores its subsequent development in Europe He outlines the various critiques of diversity management that have been suggested both by academics and equality activists and highlights recent issues and trends that should be monitored by those concerned with racial and ethnic equality in employment In particular Wrench examines whether diversity management can be seen as a soft option in terms of combating racism and discrimination or instead a new way of mainstreaming anti discrimination measures He also addresses the important question of whether the development of diversity management in Europe will follow a relatively uniform trajectory because of common demographic economic and market pressures or whether the historical cultural and institutional differences which exist between EU countries and between the EU and the US will have a determining impact on the adoption content and operation of this particular management practice How Global Migration

**Minority Rights Protection in International Law** Helen O'Nions, 2016-04-22 There are approximately ten million

Roma in Europe making them the continent's largest non territorial minority Despite this fact the Roma continue to experience routine discrimination and marginalization in European countries As a result they are seldom engaged in national political activism and are frequently at the bottom of the economic and social ladder The severity of exclusion experienced by the Roma in societies which have long paid heed to the notion of individual universal human rights combined with their geographical dispersal and heterogeneous nature makes the study of the Roma highly informative This book examines the theoretical debate concerning the most appropriate way of protecting the fundamental human rights of the Roma which also illuminates ways in which the rights of minority groups can be protected more generally As a result this work will be a valuable resource for social scientists and practitioners in the field of human rights
