Disorders Of Affect Regulation Alexithymia In Medical And Psychiatric Illness:

Disorders of Affect Regulation Graeme J. Taylor,R. Michael Bagby,James D. A. Parker,1997-02-27 This work provides an entirely new perspective on emotional influences on mental and physical health The authors present current thinking on the development and regulation of emotions and argue that several common but difficult to treat psychiatric illnesses including drug addictions eating disorders panic disorder and posttraumatic stress disorders are a consequence of an individual s inability to regulate distressing emotions through mental processes They also advance a model in which dysregulated emotions may alter other bodily systems and thereby contribute to the development of physical illnesses and diseases The book is generously illustrated throughout with clinical vignettes and provides descriptions of innovative therapeutic approaches This volume will become a valuable and stimulating reference for clinicians and researchers alike

Psychological Factors as Determinants of Medical Conditions, Volume II Gabriella Martino,Andrea Caputo,Valentina Cazzato,Carmelo Mario Vicario,2022-04-06 The Oxford Handbook of Eating Disorders W. Stewart Agras,2010-07-06 A comprehensive and up to date review of the field provides detailed and Thorough discussions of all the key topics in the study of eating disordersZafra Cooper Department of Psychiatry Oxford University **The Oxford Handbook of Personality Disorders** Thomas A. Widiger,2012-09-13 This text provides a summary of what is currently known about the diagnosis assessment construct validity etiology pathology and treatment of personality disorders It also provides extensive coverage of the many controversial changes for the DSM 5 including chapters by proponents and opponents to these changes **The Medical Basis of Psychiatry** S. Hossein Fatemi,Paula J. Clayton,2016-03-17 Four years have passed since the last edition 3rd of this book was published In the intervening years several reviews of this book have provided highly encouraging remarks about the value of this book in transmitting information on classification and treatment of psychiatric disorders to the audience We are proposing to revise all chapters with an eye on accuracy and ease of use and this is an especially timely endeavor with the upcoming publication of the Diagnostic and Statistical Manual V All the appropriate new information on biology etiology diagnosis and treatment of psychiatric disorders will be added to the current proposed edition It is our goal to recruit the same authors if possible who contributed to the previous edition While all chapters will be updated see TOC those marked by asterisks will be the most likely to undergo more revision Psychiatry has emerged as a burgeoning scientific field with major advances in etiology and treatment of several disorders Just as there was excitement in the anatomic advances that took place a hundred years ago when Emil Kraepelin and his collaborators took on the enormous task of classification of psychiatric disorders based on rational scientific thinking new advances in genetics biochemistry neuroanatomy and pharmacotherapy of mental disorders have brought us even closer to a better understanding of complex disorders like schizophrenia bipolar disorder depression and even autism The major goal of the previous edition of this classic book was to update the busy clinician psychiatric resident and medical student with the most up to date information

on etiology diagnosis and treatment of psychiatric disorders This goal remains the focus of the fourth edition of this book In this updated and expanded edition the reader will be provided with the most contemporary information and literature supported by a close survey of the field This new edition of this classic title with its focus on biologic and medical aspects of psychiatry will continue to be of significant help to all interested in the scientific practice of psychiatry The Method of Response Function in Psychology & Sociology Irina G. Malkina-Pykh, Y. A. Pykh, 2013 Social psychological and sociological systems present considerable difficulties for modellers due to their complexity multidimensionality uncertainty and irreducibility The book proposes that response functions MRF be used as a method of constructing purposeful credible and integrated social systems models from data and prior knowledge or information A semi empirical or grey box MRF model may be regarded as a trade off between a knowledge based model and a black box empirical model It may embody all the existing knowledge on the process or a part thereof and in addition it relies on parameterised functions whose parameters are determined from measurements Observations contain hidden information on the processes under consideration and one of the main purposes of the proposed method is to extract and describe these hidden relationships Parameterisation offers ways to couple qualitative with quantitative analysis This combination makes it possible to take into account all the phenomena that are not modelled with the required accuracy through prior knowledge Although only a simplified picture of the processes is modelled a grey box system model provides some insight into the system processes These processes are featured by chains of causality highlighting stressors and variables responsive to stressors The method of response functions is a nonlinear regression method that implies credible models in the sense that they are identifiable and hopefully explain system output behaviour satisfactorily For case studies the authors have selected the problems usually studied by psychologists and sociologists with statistical procedures such as investigation of variance and discriminant analysis based on the general linear model or one of its multivariate generalisations structural equation models etc disordered eating and obesity subjective well being and alexithymia An accompanying CD ROM contains the demonstration versions of three models that are discussed in the various chapters The Method of Response Functions in Psychology and Sociology is aimed at Mathematical Psychologists Mathematical Sociologists Applied Psychologists Sociologists and Social Practitioners It will also be suitable for use on undergraduate as well as graduate and postgraduate courses specializing in these areas
