Distant Fires Duluth To Hudson Bay:

Distant Fires Scott Anderson, 2008 Originally published Duluth MN Pfeiffer Hamilton Publishers c1990 *Distant Fires* Scott Anderson, Details the adventure of two men who canoed 1700 miles from Duluth Minnesota to the shores of Hudson Bay and discusses their battle with mosquitoes their struggle with a tent that doesn't stay up in the wind and their diet of macaroni and cheese for countless breakfasts *The American Adrenaline Narrative* Kristin J. Jacobson, 2020-06-01 The American Adrenaline Narrative considers the nature of perilous outdoor adventure tales their gendered biases and how they simultaneously promote and hinder ecological sustainability To explore these themes Kristin J Jacobson defines and compares adrenaline narratives by a range of American authors published after the first Earth Day in 1970 a time frame selected as a watershed moment for the contemporary American environmental movement The forty plus years since that day also mark the rise in the popularity and marketing of many things as extreme including sports jobs travel beverages gum makeovers laundry detergent and even the environmental movement itself Jacobson maps the American eco imagination via adrenaline narratives grounding them in the traditional literary practice of close reading analysis and in ecofeminism She surveys a range of popular and lesser known primary texts by American authors including best selling books such as Jon Krakauer's *Into Thin Air* and Aron Ralston's *Between a Rock and a Hard Place* and lesser known texts such as Patricia C McCairen's *Canyon Solitude* Eddy L Harris's *Mississippi Solo* and Stacy Allison's *Beyond the Limits* She also discusses such narratives as they appear in print and online articles and magazines feature length and short films television shows amateur videos social networking site posts fiction advertising and blogs Jacobson contends that these stories constitute a distinctive genre because unlike traditional nature travel and sports writing adrenaline narratives sustain heightened risk or the element of the extreme within a natural setting Additionally these narratives provide important insight into the American environmental imagination's connection to masculinity and adventure knowledge that helps us grasp the current climate crisis and how narrative understanding provides a needed intervention *The Minnesota Book of Skills* Chris Niskanen, 2012 Minnesotans are a highly skilled bunch whether pursuing traditional activities like wild rice and pickling or tastefully displaying taxidermy or selecting the right fishing bait Skills particularly appropriate to Minnesota such as creating seed art or baking a Bundt cake may be fully on display at the state fair a prime opportunity to join with neighbors in celebrating our many talents The Minnesota Book of Skills brings to life the basic know how that makes us uniquely Minnesotan Seasonal tips like how to gracefully exit a ski lift mingle with skills your grandparents knew well such as what to forage for while on a hike How soon is too soon to bring a child to the Boundary Waters or set her up on hockey skates The answers are here Maybe you'll never carve an ice sculpture or build your own coffin but isn't it comforting to know that one handy book offers just the guidance you'll need **BWCA Wilderness News**, 1985 *The Conservation Volunteer*, 1989 *Free Flight* James Fallows, 2008-11-05 The troubles of the airline system have become acute in the post terrorist era As the average cost of a

flight has come down in the last twenty years the airlines have survived by keeping planes full and funneling traffic through a centralized hub and spoke routing system Virtually all of the technological innovation in airplanes in the last thirty years has been devoted to moving passengers more efficiently between major hubs But what was left out of this equation was the convenience and flexibility of the average traveler Now because of heightened security hours of waiting are tacked onto each trip As James Fallows vividly explains a technological revolution is under way that will relieve this problem Free Flight features the stories of three groups who are inventing and building the future of all air travel NASA Cirrus Design in Duluth Minnesota and Eclipse Aviation in Albuquerque New Mexico These ventures should make it possible for more people to travel the way corporate executives have for years in small jet planes from the airport that's closest to their home or office directly to the airport closest to where they really want to go This will be possible because of a product now missing from the vast array of flying devices small radically inexpensive jet planes as different from airliners as personal computers are from mainframes And as Fallows explains in a new preface a system that avoids the congestion of the overloaded hub system will offer advantages in speed convenience and especially security in the new environment of air travel
