Distributed System Lab Manual:

Self-Managing Distributed Systems Marcus Brunner,Alexander Keller,2004-01-20 This book constitutes the refereed proceedings of the 14th IFIP IEEE International Workshop on Distributed Systems Operations and Management DSOM 2003 held in Heidelberg Germany in October 2002 The 20 revised full papers and 6 revised short papers presented together with a keynote paper were carefully reviewed and selected from a total of 105 submissions The papers are organized in topical sections on self configuration peer to peer management self optimization and performance management utility management self protection and access control manageability and instrumentation and context awareness **Reliable Distributed System Software** John A. Stankovic,1985 Concurrency Control and Reliability in Distributed Systems Bharat K. Bhargava,1987 The major objective of a distributed system is to provide low coast availability of the resources of the system by localizing access and providing insulation against failures of individual components Since many users can be concurrently accessing the system it is essential that a distributed system also provide a high degree of concurrency Research into algorithms has been focused on concurrency consistency failure detection management of replicated copy and commitment and termination of transactions This book is a compilation of a subset of research contributions in the area of concurrency control and reliability in distributed systems with brief explorations of interesting areas including theoretical and experimental efforts **The ...
