

- **Versatility and Flexibility**

The 2100C accommodates up to 8 vessels ranging in size from 500 mL to 4 L, allowing a wider range of tests to be run on the same unit.

- **Interchangeable Paddles & Baskets**

USP-compliant interchangeable stirring devices are coupled with a "quick-change" height adjustment spacer to provide a fast transition between USP Apparatus 1 and USP Apparatus 2, without having to remove the shaft.

- **Automatic Height Adjustment**

A one-time height adjustment allows for the automatic setting of height when utilizing interchangeable paddles and baskets.

- **"Hideaway" Thermocirculator**

The small vertical design allows the circulator to be "tucked" behind the bath, requiring no additional linear bench space. The fast microprocessor and high-flow pump allow for improved temperature uniformity and control.

- **Single Piece Molded Water Bath**

With no seams to leak or crack, the molded design ensures that no "dead" areas exist and leaves less residual bath water after draining for quicker, easier cleanup.

- **Non-Motorized Lift**

A simplified lift mechanism allows users to easily raise and lower the drive head without the need of an expensive motorized lift.

- **Built-in Communications**

Integrated RS-232 port and parallel printer port allow for external instrument control through the Agilent UV-Vis Spectrophotometer and reporting via an external printer.
