Modeling and Simulation of Carbon Emission Related Issues Wen-Hsien Tsai, 2019-08-19 Carbon emissions reached an all time high in 2018 when global carbon dioxide emissions from burning fossil fuels increased by about 2.7% after a 1.6% increase in 2017. Thus we need to pay special attention to carbon emissions and work out possible solutions if we still want to meet the targets of the Paris climate agreement. This Special Issue collects 16 carbon emissions related papers including 5 that are carbon tax related and 4 energy related papers using various methods or models such as the input output model, decoupling analysis, life cycle impact analysis, LCIA, relational analysis model, generalized Divisia index model, GDIM forecasting model, three indicator allocation model, mathematical programming, real options model, multiple linear regression etc. The research studies come from China, Taiwan, Brazil, Thailand, and United States. These researches involved various industries such as agricultural industry, transportation industry, power industry, tire industry, textile industry, wave energy industry, natural gas industry, and petroleum industry. Although this Special Issue does not fully solve our concerns, it still provides abundant material for implementing energy conservation and carbon emissions reduction. However, there are still many issues regarding the problems caused by global warming that require research. *Translational Interventional*

Radiology Adam E.M. Eltorai, Tao Liu, Rajat Chand, Sanjeeva P. Kalva, 2023-04-05 *Translational Interventional Radiology* a volume in the Handbook for Designing and Conducting Clinical and Translational Research series covers the principles of evidence based medicine and applies these principles to the design of translational investigations in Interventional Radiology. The reader will come to fully understand important concepts including case control study, prospective cohort study, randomized trial, and reliability study. Medical researchers will benefit from greater confidence in their ability to initiate and execute their own investigations, avoid common pitfalls in Interventional Radiology, and know what is needed for successful collaboration. Further, this reference is an indispensable tool in grant writing and funding efforts. The practical, straightforward approach helps aspiring investigators navigate challenging considerations in study design and implementation. This book provides valuable discussions of the critical appraisal of published studies in Interventional Radiology, elucidating the evaluation of the quality with respect to measuring outcomes and making effective use of all types of evidence in patient care. In short, this practical guide will be of interest to every medical researcher and interventional radiologist who has ever had a good clinical idea but not the knowledge of how to test it. Focuses on the principles of evidence based medicine and applies these principles to the design of translational investigations within interventional radiology. Provides a practical, straightforward approach that helps investigators navigate challenging considerations in study design and implementation. Details discussions of the critical appraisal of published studies in interventional radiology, supporting evaluation with respect to measuring outcomes and making effective use of all types of evidence in patient care.
