**Evolution and the Human Mind** Peter Carruthers, Andrew Chamberlain, 2000-11-02 This volume of essays offers an interdisciplinary examination of the evolution of the human mind

**Systemic Semiotics** Piotr Sadowski, 2022-09-08 Against the background of often esoteric literature in semiotics this book offers a fresh and rigorous new interpretation of how to approach the study of communication signs and meaning Grounded in a deductive theory of interacting systems Piotr Sadowski's book provides an accessible account of the hierarchy of communication Divided into two parts this book argues in the first section that a deductive semiotic theory generates communication situations of increasing complexity from contiguous communication to indirect referential forms based on indexical iconic and symbolic signs Within this system Sadowski explains how key concepts of the semiotic model such as information parainformation and metainformation can account for degrees of cognitive complexity of communication processes including the perception and interpretation of signs on literal and figurative levels After this clear step by step exposition of the theory of interacting systems Systemic Semiotics then explores various applications of this theory providing new insights into problems subsumed under communication studies cultural theory literary and film studies and psychology

**The Oxford Handbook of Cognitive Archaeology** Thomas Wynn, Karenleigh Overmann, Frederick Coolidge, 2024-03-27 The Oxford Handbook of Cognitive Archaeology is a landmark publication showcasing the theories methods and accomplishments of archaeologists who investigate the human mind including its evolutionary development its ideation thoughts and beliefs and its very nature through material forms The volume encompasses the wide spectrum of the discipline showcasing contributions from more than 50 established and emerging scholars from Europe Africa Asia Australia and the Americas Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that ground interpretations Significantly the majority of chapters deliver substantive contributions that analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium These examples include the gamut of methods and techniques including typology replication studies chaînes opératoires neuroarchaeology ethnographic comparison and the direct historical approach

**Verbal Communication** Andrea Rocci, Louis de Saussure, 2016-03-07 Common sense tells us that verbal communication should be a central concern both for the study of communication and for the study of language Language is the most pervasive means of communication in human societies especially if we consider the huge gamut of communication phenomena where spoken and written language combines with other modalities such as gestures or pictures Most communication researchers have to deal with issues of language use in their work Classic methods in communication research from content analysis to interviews and questionnaires not to mention the obvious cases of rhetorical analysis and discourse analysis presuppose the understanding of the meaning of spontaneous or elicited verbal productions Despite its pervasiveness verbal communication does not

currently define one cohesive and distinct subfield within the communication discipline The Handbook of Verbal Communication seeks to address this gap In doing so it draws not only on the communication discipline but also on the rich interdisciplinary research on language and communication that developed over the last fifty years as linguistics interacted with the social sciences and the cognitive sciences The interaction of linguistic research with the social sciences has produced a plethora of approaches to the study of meanings in social context from conversation analysis to critical discourse analysis while cognitive research on verbal communication carried out in cognitive pragmatics as well as in cognitive linguistics has offered insights into the interaction between language inference and persuasion and into cognitive processes such as framing or metaphorical mapping The Handbook of Verbal Communication volume takes into account these two traditions selecting those issues and themes that are most relevant for communication scholars It addresses background matters such as the evolution of human verbal communication and the relationship between verbal and non verbal means of communication and offers a an extensive discussion of the explicit and implicit meanings of verbal messages with a focus on emotive and figurative meanings Conversation and fundamental types of discourse such as argument and narrative are presented in depth as is the key notion of discourse genre The nature of writing systems as well as the interaction of spoken or written language with non verbal modalities are devoted ample attention Different contexts of language use are considered from the mass media and the new media to the organizational contexts Cultural and linguistic diversity is addressed with a focus on phenomena such as multilingual communication and translation A key feature of the volume is the coverage of verbal communication quality Quality is examined both from a cognitive and from a social perspective It covers topics that range from to the cognitive processes underlying deceptive communication to the methods that can be used to assess the quality of texts in an organizational context

Human Evolutionary Psychology Louise Barrett, Robin Dunbar, John Lycett, 2002-02-17 Why do people resort to plastic surgery to look young Why are stepchildren at greatest risk of fatal abuse Why do we prefer gossip to algebra Why must Dogon wives live alone in a dark hut for five days a month Why are young children good at learning language but not sharing Over the past decade psychologists and behavioral ecologists have been finding answers to such seemingly unrelated questions by applying an evolutionary perspective to the study of human behavior and psychology Human Evolutionary Psychology is a comprehensive balanced and readable introduction to this burgeoning field It combines a sophisticated understanding of the basics of evolutionary theory with a solid grasp of empirical case studies Covering not only such traditional subjects as kin selection and mate choice this text also examines more complex understandings of marriage practices and inheritance rules and the way in which individual action influences the structure of societies and aspects of cultural evolution It critically assesses the value of evolutionary explanations to humans in both modern Western society and traditional preindustrial societies And it fairly presents debates within the field identifying areas of compatibility among sometimes competing approaches Combining a broad scope with the more in depth

knowledge and sophisticated understanding needed to approach the primary literature this text is the ideal introduction to the exciting and rapidly expanding study of human evolutionary psychology

**Rhetoric and Cognition** Thierry Herman, Steve Oswald, 2014

This volume gathers contributions from two disciplines which have much to gain from one another rhetoric and cognitive science as they both have much to say in the broad realm of argumentation studies This collection neither condemns the fallacious effects of specific argument schemes nor adds yet another layer to fallacy criticism but studies how argumentation and fallacies work hic et nunc What are the linguistic and cognitive mechanisms behind the performance of fallacious arguments How do rhetorical strategies work at the interface of cognition language science and society

**Stephen Jay Gould and the Politics of Evolution** David Forrest Prindle, 2009

While many people have written about Gould's science and a few have written about his politics this is the first book to explore his science and politics as a consistent whole Political scientist Prindle argues that Gould's concepts and arguments were bona fide contributions to science but all of them also contained specifically political implications

*Rethinking the Human Revolution* Paul Mellars, 2007

Arising from a conference Rethinking the Human Revolution reconsiders all of the central issues in modern human behavioural cognitive biological and demographic origins in the light of new information and new theoretical perspectives which have emerged over the past twenty years of intensive research in this field The 34 papers cover topics ranging from the DNA and skeletal evidence for modern human origins in Africa through the archaeological evidence for the emergence of distinctively modern patterns of human behaviour and cognition to the various lines of evidence for the geographical dispersal patterns of biologically and behaviourally modern populations from their African origins throughout Asia Australasia and Europe over the past 60 000 years
