integration of both domains In the first section which is most representative of the integrative tendency a general framework of research on human development learning and instruction is outlined The next six chapters are concerned with the various aspects of human development and learning The remaining nine sections represent an overview of the research findings on learning and instruction which are relevant to education Articles include updated and revised material from the International Encyclopedia of Education 2nd Edition described by Choice as being a premier resource when judged on virtually every criteria applied to a reference work The Encyclopedia provides an informative introduction to aspects of developmental psychology and instructional psychology that significantly influence education
