

Exploration Guide: Fan Cart Physics

Getting Set-up

Use any Internet Browser to go to explorefelearning.com and login using your chosen username and password.

Launch the Gizmo "Fan Cart Physics," read this Exploration Guide, and get started. Answer lab questions in your notebook and do the assessment at the end. Summary questions will be given separately.

Introduction

Imagine a race between two horses, each of which is pulling a wagon. The wagons are identical, but one is filled with bags of cement while the other is empty. Ten seconds into the race, which of the wagons would you expect to be in the lead? Which wagon will be traveling the fastest?

Consider a second race. Both of the wagons are loaded with bags of cement, but this time one wagon is pulled by a team of four horses, while the other is pulled by only one horse. Ten seconds into this race, which wagon will be in the lead? Which will be traveling the fastest?

These scenarios provide examples of how the mass of an object, as well as the force acting on the object, affect its acceleration. The relationship is expressed mathematically as Newton's Second Law of Motion. It is one of the most powerful and far-reaching laws in all of science.

Force and Acceleration

In this activity, you will examine how different forces applied to an object affect its acceleration. The object, in this case, will be a cart, and the forces will be applied by fans sitting on the cart. When the fan blows to the left, the force on the cart is directed to the right, and vice versa.

Things to notice and check out about this gizmo before beginning:

- Notice fans and masses that can be added to the cart.

- Notice the on/off switches for the fans and the control panel for making the cart go.
- Notice the tabs toward the right of the screen: "description," "table," "bar chart," and "graph." Click through these tabs to get a sense of what they are.

1. Add all three fans to the cart. All fans should be blowing to the left (**DIRECTIONS** set to +). Turn on fan A. Start the cart by clicking play. Stop the cart before it hits the wall by clicking the pause button.

In the **GRAPH** tab, compare the three different graphs.

x = distance v = velocity
 t = time a = acceleration

- a. In your notebook, draw a simple sketch of graph "x vs t." Label the axes and title the graph. On your graph, label the numeric value for the distance covered by the cart at time = 6 seconds. Use the **TABLE** tab to get an accurate measurement.

Describe, in words, the following information:

- 1) the shape of this graph
- 2) what this graph is trying to say. Ex: how does the distance covered change in the 1st two seconds vs. the last 2 seconds?

- b. In your notebook, draw a simple sketch of graph "v vs t." Label the axes and title the graph. On your graph, label the numeric value for the velocity at $t = 0$ sec and $t = 4$ sec.

Describe, in words, what the graph is saying.

- c. In your notebook, draw a simple sketch of graph "a vs t." Label the axes and title the graph. On your graph, label the numeric value for acceleration.

Describe, in words, what the graph is saying.

2. Reset and turn on fans A & B. Run the cart again and stop before it hits the wall.

Exploration Guide Fan Cart Physics Answers

G Thomas

Exploration Guide Fan Cart Physics Answers:

Workshop Physics Activity Guide Module 1 Priscilla W. Laws, David P. Jackson, Brett J. Pearson, 2023-08-01 The Workshop Physics Activity Guide is a set of student workbooks designed to serve as the foundation for a two semester calculus based introductory physics course It consists of four Modules with a total of 28 units that interweave text materials with activities that include prediction qualitative observation explanation equation derivation mathematical modeling quantitative experiments and problem solving The modules help students understand the basis of knowledge in physics as interplay between observations experiments definitions and mathematical theory The inquiry based activities in the modules give students the opportunity to work collaboratively to solve problems while thinking critically to make predictions and observations Students use a powerful set of computer tools to record display and analyze data as well as to develop mathematical models of physical phenomena The design of many of the activities is based on the outcomes of physics education research Module 1 Unit 1 Our Place in the Universe Unit 2 Measurement and Uncertainty Unit 3 Introduction to One Dimensional Motion Unit 4 Motion with Constant Acceleration Unit 5 Force Mass and Motion in One Dimension Unit 6 Gravity and Projectile Motion Unit 7 Applications of Newton's Laws

Popular Science, 2004-12 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better

Immerse yourself in the artistry of words with Experience Art with is expressive creation, Discover the Artistry of **Exploration Guide Fan Cart Physics Answers** . This ebook, presented in a PDF format (*), is a masterpiece that goes beyond conventional storytelling. Indulge your senses in prose, poetry, and knowledge. Download now to let the beauty of literature and artistry envelop your mind in a unique and expressive way.
