 draws together the insights of eminent academics and specialists to present an overview of past and present approaches to  
 transnational policing throughout the Anglophone world It aims to revitalize the study of transnational policing by showing  
 that past and present developments in this field remain poorly understood while also suggesting future avenues of research  
 Containing chapters on police history police accountability gendered hate crime in an increasingly online world counter  
 radicalisation strategies being pursued around the world internet facilitated sex trafficking and changes in organised crime  
 amongst others the authors adopt revisionist orthodox and progressive views in order to challenge our understanding and  
 appreciation of developments in transnational policing All of the chapters in the book use policing models employed within  
 the UK as either their focal point or as a point of comparison so that direct comparisons and contrasts can be examined The  
 Development of Transnational Policing illustrates distinctive and separate aspects of what remains an undoubtedly complex  
 and dynamic field but also forms an overview of developments and the dearth of academic research which surround them in
