

A person is silhouetted against a bright sunset, standing on a dark, rocky outcrop. The sun is low on the horizon, creating a strong lens flare and illuminating the scene with a warm, golden light. In the background, there are rolling hills or mountains under a clear sky.

addresses client problems but also illuminates the impact of clinical work on the therapist how what happens in sessions spills over into the personal lives of both parties and how we can understand the myriad often unpredictable ways in which change occurs over time Delving into vital personal professional and ethical issues that are often neglected in clinical training and offering insights to stimulate further thinking and discussion the volume is deeply instructive This volume is a rewarding resource for psychotherapists from a range of backgrounds including clinical psychologists clinical social workers couple and family therapists and psychiatrists It is also an invaluable tool for professional workshops or graduate training programs

Psychotherapist Revealed Andrea Bloomgarden, Rosemary B. Mennuti, 2010-06-10 In this edited volume the real dialogue begins Therapists speak openly and honestly about their self disclosure practices decisions and clinical dilemmas Bloomgarden and Mennuti bring together research training and tales from their clinical experience to illuminate lessons derived from their own journeys toward judicious balanced self disclosure practices In a readable fashion the stories highlight a variety of self disclosure and boundary issues that occur in the course of psychotherapy Numerous treatment modalities and clinical orientations are represented The collective wisdom offered through these stories which includes suggested guidelines and a standard of care for good practice will assist the reader in developing a better understanding of what it means to self disclose appropriately recognizing a flexible middle ground between too much and too little along with responsiveness to client need The Freudian based taboo that rigidly warns against all self disclosure is antiquated and a more reasonable balanced perspective is under way As a psychotherapeutic community including psychologists social workers art therapists counselors dance movement therapists who are all represented in this book it is time to talk openly about a balanced judicious and therapeutically appropriate approach to self disclosure and boundaries Bravely that is exactly what the authors in this book have done

Secrets and Lies in Psychotherapy Barry A. Farber, Matthew Blanchard, Melanie Love, 2019-02 "To be that Self which One Truly Is", 1991 Ideally psychotherapy is not a one sided enterprise therapists like their clients are on a journey of growth and discovery and clients may teach their therapists as much as therapists teach their clients Thus both therapist and client may be endeavoring to discover understand and be his or her true self The journey of beginning therapists may be particularly intense as they struggle to make meaning of the therapeutic encounter their new role as therapists and issues of theoretical orientation This case study explores the parallel yet intertwined journeys of therapist and client in the therapeutic relationship In the current project I describe and evaluate my professional development as a beginning client centered therapist over a period of twenty months of work with an adult male in an outpatient setting Data for the case was collected from therapy session notes private therapist notes and random audiotapes of sessions Both the client and the therapist are examined as subjects of change although more space is devoted to the therapist's growth One stimulus for change is analyzed in the client the therapeutic relationship Several stimuli for change in the therapist are examined as there are multiple sources of influence in therapist training and development Thus factors

other than the therapeutic relationship such as theory academic environment training environment and student status are taken into account in the examination of change in the therapist The case analysis includes a client centered case conceptualization and a description of the five stages of the therapist s professional development Discussion of each stage includes exploration of the client s progress and the therapist s therapeutic behaviors A critique of the therapist s treatment approach is also included in which the therapist s therapeutic behaviors are classified as consistent or inconsistent with a classical client centered approach The discussion and conclusions section includes classification of the therapist s current therapeutic approach in light of the theoretical debates around nondirectivity in the client centered community and an exploration of implications for the training of client centered therapists
