First Person Plural Multiple Personality And The Philosophy Of Mind

**Owen Flanagan Professor of
Philosophy Duke University**

First Person Plural Multiple Personality And The Philosophy Of Mind:

First Person Plural Stephen E. Braude, 1991 Do people with multiple personalities have more than one self The first full length philosophical study of multiple personality disorder First Person Plural maintains that even the deeply divided multiple personality contains an underlying psychological unity Braude updates his work in this revised edition to discuss recent empirical and conceptual developments including the charge that clinicians induce false memories in their patients and the professional redefinition of multiple personality disorder as dissociative identity disorder Self Expressions : Mind, Morals, and the Meaning of Life Owen Flanagan Professor of Philosophy Duke University, 1995-12-28 Human beings have the unique ability to consciously reflect on the nature of the self But reflection has its costs We can ask what the self is but as David Hume pointed out the self once reflected upon may be nowhere to be found The favored view is that we are material beings living in the material world But if so a host of destabilizing questions surface If persons are just a sophisticated sort of animal then what sense is there to the idea that we are free agents who control our own destinies What makes the life of any animal even one as sophisticated as Homo sapiens worth anything What place is there in a material world for God And if there is no place for a God then what hold can morality possibly have on us why isn't everything allowed Flanagan's collection of essays takes on these questions and more He continues the old philosophical project of reconciling a scientific view of ourselves with a view of ourselves as agents of free will and meaning makers But to this project he brings the latest insights of neuroscience cognitive science and psychiatry exploring topics such as whether the conscious mind can be explained scientifically whether dreams are self expressive or just noise the moral socialization of children and the nature of psychological phenomena such as multiple personality disorder and false memory syndrome What emerges from these explorations is a liberating vision which can make sense of the self agency character transformation and the value and worth of human life Flanagan concludes that nothing about a scientific view of persons must lead to nihilism Irreducible Mind Edward F. Kelly, Emily Williams Kelly, 2007 Practically every contemporary mainstream scientist presumes that all aspects of mind are generated by brain activity We demonstrate the inadequacy of this picture by assembling evidence for a variety of empirical phenomena which it cannot explain We further show that an alternative picture developed by F W H Myers and William James successfully accommodates these phenomena ratifies the common sense view of ourselves as causally effective conscious agents and is fully compatible with contemporary physics and neuroscience Self Expressions Owen Flanagan, 1996-01-25 In this trailblazing collection of essays on free will and the human mind distinguished philosopher Owen Flanagan seeks to reconcile a scientific view of ourselves with an account of ourselves as meaning makers and agents of free will He approaches this old philosophical quagmire from new angles bringing to it the latest insights of neuroscience cognitive science and psychiatry Covering a host of topics these essays discuss whether the conscious mind can be explained scientifically whether dreams are self expressive or just noise the moral socialization of children and the nature of

psychological phenomena Ultimately Flanagan concludes that a naturalistic view of the self need not lead to nihilism but rather to a liberating vision of personal identity which makes sense of agency character transformation and the value and worth of human life

International Legal Personality Fleur Johns, 2017-07-05 Who or what is entitled to act on the international plane Where should responsibility for violations of international law lie What sort of entities are capable of possessing international legal rights What is the status of individuals minority groups non governmental bodies international organisations and animals in the international legal order and how has their status shifted over time International Legal Personality contains fourteen articles that address these and related questions In historical and contemporary writings international lawyers grapple with the nature of legal identity and confront global distributions of authority and responsibility as they explore who or what is a person in the international legal order These essays document the emergence of an international legal order increasingly conceived in terms of patterns and probabilities rather than as the stagecraft of a small company of permanent players

The Gold Leaf Lady and Other Parapsychological Investigations Stephen E. Braude, 2008-11-15 For over thirty years Stephen Braude has studied the paranormal in everyday life from extrasensory perception and psychokinesis to mediumship and materialization The Gold Leaf Lady and Other Parapsychological Investigations is a highly readable and often amusing account of his most memorable encounters with such phenomena Here Braude recounts in fascinating detail five particular cases some that challenge our most fundamental scientific beliefs and others that expose our own credulousness Braude begins with a south Florida woman who can make thin gold colored foil appear spontaneously on her skin He then travels to New York and California to test psychokinetic superstars and frauds like Joe Nuzum who claim to move objects using only their minds Along the way Braude also investigates the startling allegations of K R a policeman in Annapolis who believes he can transfer images from photographs onto other objects including his own body and Ted Serios a deceased Chicago elevator operator who could make a variety of different images appear on Polaroid film Ultimately Braude considers his wife s surprisingly fruitful experiments with astrology which she has used to guide professional soccer teams to the top of their leagues as well as his own personal experiences with synchronicity a phenomenon he argues that may need to be explained in terms of a refined extensive and dramatic form of psychokinesis

Heady provocative and brimming with eye opening details and suggestions The Gold Leaf Lady and Other Parapsychological Investigations will intrigue both adherents and detractors of its controversial subject matter alike

[Phenomenology, Neuroscience and Clinical Practice](#) Francesca Brencio, 2024-09-13 This book offers fundamental insights into three main fields of education and expertise phenomenology neuroscience and clinical practice The richness and pluralism of the contributions aim to overcome the reductionist and dualistic approach to mental health and shed new light on clinical practice Designed as both an education tool for mental health professionals and a theoretical investigation for philosophers on the use of phenomenology in clinical practice this book highlights the need for a new direction on mental health and more

general on human wellbeing This volume aims to fill the gap between philosophers and mental health professionals on an educational level in a space unique in its open and transdisciplinary approach It appeals to students and researchers but also very much to professionals and clinicians in the field

The Disordered Mind George Graham, 2020-09-14 The Disordered Mind Third Edition is a wide ranging introduction to the philosophy of mental disorder or illness It examines and explains from a philosophical standpoint what mental disorder is Its reality causes consequences compassionate treatment and more Revised and updated throughout the third edition includes enhanced discussions of the distinction between mental health and illness selfhood and delusions about the self impairments of basic psychological capacities in mental disorder and the distinct roles that mental causation and neural mechanisms play in mental illness The book is organized around four questions What is a mental disorder or illness What makes mental disorder something bad What are various mental disorders and what do they tell us about the mind What is mental health and how may it be restored Numerous disorders are discussed including addiction agoraphobia delusion depression dissociative identity disorder obsession compulsion schizophrenia and religious scrupulosity among others Several neurological disorders are examined Various problems associated with DSM 5 and with psychiatric diagnosis are explored Including chapter summaries and suggestions for further reading The Disordered Mind is an ideal text for courses in philosophy and should appeal to not just philosophers but to readers in cognitive science psychology psychiatry and related mental health professions
