First Year University Writing A Corpus Based Study With Implications For Pedagogy:

First-Year University Writing L. Aull, 2015-03-04 First Year Writing describes significant language patterns in college writing today how they are different from expert academic writing and how to inform teaching and assessment with corpus based linguistic and rhetorical genre analysis *How Students Write: A Linguistic Analysis* Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first year student writing How Students Write brings a fresh perspective to this perennial observation using corpus linguistics techniques This study analyzes sentence level patterns in student writing to develop an understanding of how students present evidence draw connections between ideas relate to their readers and ultimately learn to construct knowledge in their writing Drawing on both first year and upper level student writing the book examines the discourse of students at different points in their education It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students choices In focusing on sentence level features such as hedges perhaps and boosters definitely this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas Attention to these features can help instructors foster civil discourse design effective assignments and expose and question norms of higher education **Style and the Future of Composition Studies** Paul Butler, Brian Ray, Star Medzerian Vanguri, 2020-11-02 Style and the Future of Composition Studies explores style s potential for informing how students are taught to write well and its power as a tool for analyzing the language and discourse practices of writers and speakers in a range of contexts Many college writing teachers operate under the belief that style still refers primarily to the kinds of issues discussed in Strunk and White s popular but outdated book The Elements of Style This work not only challenges this view but also offers theories and pedagogies from diverse perspectives that help teachers and students develop strategic habits and mindsets to negotiate languages genres and discourse conventions The chapters explore the ways in which style directly affects and is affected by multiple sources of shifting disciplinary inquiry contributing new insights by drawing on research in cultural studies sociolinguistics discourse studies translingualism and writing across the curriculum as well as new approaches to classical rhetorical theory The reemergence of stylistic inquiry can be used dynamically to produce new insights not only about emerging disciplinary interests but also about the study of style as a kind of language in and of itself Style and the Future of Composition Studies demonstrates that style deserves to be a central focus of writing teaching More than just the next style collection the book advocates for style s larger prominence in composition discussions generally It will be of interest to a broad range of students and scholars of writing studies as well as a wider set of readers in academe Contributors Cydney Alexis Laura Aull Anthony Box Jimmy Butts Mike Duncan William FitzGerald Melissa Goldthwaite Eric House TR Johnson Almas Khan Zak Lancaster Eric Leake Andrea Olinger Thomas Pace Jarron Slater Jonathan Udelson *Corpora and Rhetorically Informed Text Analysis* David West Brown, Danielle Zawodny Wetzel, 2023-06-15 Corpora and Rhetorically Informed Text Analysis explores

applications of rhetorically informed approaches to corpus research Bringing together contributions from scholars in a variety of fields it takes up questions of how theories and traditions in rhetorical analysis can be integrated with corpus techniques in order to enrich our understanding of language use variation and history The studies included in this volume shed light on areas as diverse as student academic writing political discourse and the digital humanities These studies all make use of a dictionary based tagger called DocuScope which recognizes tens of millions of words and phrases and slots them into categories based on their rhetorical functions While DocuScope provides a through line that both links the studies various analytical procedures and primes their rhetorical insights the volume is about more than the explanatory power of a single tool It demonstrates how rhetorically informed approaches can complement more established corpus methodologies underscoring their combined potential
