*What is Applied Cognitive Linguistics?* Andrea Tyler, Lihong

Huang, Hana Jan, 2018-04-23 Many SLA professionals remain unaware of what CL and Applied Cognitive Linguistics are and of the tremendous potential these approaches offer for our understanding of L2 learning and pedagogy The volume addresses this gap by presenting theoretically grounded empirically based studies which illustrate the application of key concepts of CL and demonstrate the efficacy of using the concepts in the classroom or in basic L2 research The Cognitive Humanities

Peter Garratt, 2016-11-23 This book identifies the cognitive humanities with new approaches to literature and culture that engage with recent theories of the embodied mind in cognitive science If cognition should be approached less as a matter of internal representation a Cartesian inner theatre than as a form of embodied action how might cultural representation be rethought What can literature and culture reveal or challenge about embodied minds The essays in this book ask what new directions in the humanities open up when the thinking self is understood as a participant in contexts of action even as extended beyond the skin Building on cognitive literary studies but engaging much more extensively with 4E cognitive science embodied embedded enactive extended than previously the book uses case studies from many different historical settings such as early modern theatre and digital technologies and in different media narrative art performance to explore the embodied mind through culture

**Metaphors of Eucharistic Presence** Stephen R. Shaver, 2021-11-16 In *Metaphors of Eucharistic Presence* Language Cognition and the Body and Blood of Christ Stephen R Shaver brings together the fields of cognitive linguistics and liturgical theology to propose a new approach to the ecumenically controversial issue of eucharistic presence Drawing from the work of cognitive linguists such as George Lakoff Gilles Fauconnier and Mark Turner and theologians such as Robert Masson and John Sanders Shaver argues that there is no clear division between literal and figurative language rather human cognition is grounded in sensorimotor experience and phenomena such as metaphor and conceptual blending are basic building blocks of thought Complex realities are ordinarily understood by means of more than one metaphor Inherited models of eucharistic presence then are not necessarily mutually exclusive but can serve as complementary members of a shared ecumenical repertoire

**Herodotean Soundings** Andreas Schwab, Alexander Schütze, 2023-06-19 This volume is dedicated to the logos of Cambyses at the beginning of Book 3 in Herodotus Histories one of the few sources on the Persian conquest of Egypt that has not yet been exhaustively explored in its complexity The contributions of this volume deal with the motivations and narrative strategies behind Herodotus characterization of the Persian king but also with the geopolitical background of Cambyses conquest of Egypt as well as the reception of the Cambyses logos by later ancient authors *Herodotean Soundings* The Cambyses Logos exemplifies how a multidisciplinary approach can contribute significantly to a better understanding of a complex work such as Herodotus Histories □□□□

These areas include lexical semantics cognitive grammar metaphor prototypes pragmatics narrative and discourse computational and translation models and are considered within the contexts of language change child language acquisition language and culture grammatical features and word order and gesture Despite possible differences in philosophical approach to the role of language in cognitive tasks these papers are similar in a fundamental way they all share a commitment to the view that human categorization involves mental concepts that have fuzzy boundaries and are culturally and situation based
